Staphylococcus infection, secondary, *benefit from, in tuberculous pyo*-pneumothorax, 1867—ab
  infections of skin, inoculations of *polyvalent* staphylococcus suspensions in, 680—O
  suspensions, *polyvalent, inoculations* of, in staphylococcus infections of skin, 680—O
  vaccine in inflammatory conditions of genitourinary organs, 797—O
Starch dust, absence of respiratory disorders in those inhaling, over long periods, 1600—ab
  indigestion in infants, 1948—ab
Starches, importance of, in infant feeding, 745—ab
Starvation, disguised, and reasoning faculties, 2177—ab
  lime, as dietetic cause of pulmonary tuberculosis, *treatment based* on that assumption, 2033—ab
State, duty of, to sick, 2122—ab
State-board examinations, methods and object of, 515—O
  requirements of preliminary education, 580, 582
  statistics, a correction, 45
State-boards having authority to refuse recognition to low grade medical colleges, 583
  sectarian, states having, 585
States requiring graduation from medical college, 583
Statistics, cancer, 901—ab
  in regard to inherited syphilis, 418—ab
  state board, a correction, 45
  uniform, for puerperal fever, 2024-ab
  vital, 136—O
  vital, for 1908, 1567—E
  vital, international conference on, 1033—E, 1049
  vital, Irish, 880
  vital, of Cuba, 1197
Status-lymphaticus, 1208—ab
  fatal, in patient operated on for tonsillar hypertrophy under cocain-adrenalin infiltration, 1863-ab
Stenosis, acquired, pulmonary, 1601—ab
  laryngotracheal, surgical treatment of, 2045—ab
  mitral, as cause of paralysis of left recurrent laryngeal nerve, 35—E
  mitral, in childhood, 898—ab
  of aorta in young free from rheumatism, 273—ab
  pyloric, hypertrophic, with autopsy findings, 817—ab
  pyloric, in infants and children, 154—ab
  spasmodic, of esophagus demonstrated by x-ray, 71—ab
Stereognosis of pre-Rolandic area, 227—ab
Stereoscope, stereoscopy without, 43
Stereoscopy without stereoscope, 43
Sterility and dysmenorrhea in women, surgical treatment of most frequent cause of, 970—ab
  dysmenorrhea, and amenorrhea, stem pessary for, 1730—O
Sterilization in Cesarean section, 147—ab
  of criminals and defectives, 415—ab, 737—ab, 1415, 1420—ab, 1587—ab, 1897—O
  of instruments, superiority of hot oil for, 331—ab
  of skin of operation areas, 897—ab
  of tuberculous pregnant women, panhysterectomy for, 423—ab
  of woman after Cesarean section, justifiability of, 147—ab
Sterilizing, hot-air, special heater for, 321—ab
Still's disease, 323—ab, 1943—ab
Stimuli, olfactory, followed by localized facial sweating, 207—O
Stitch, subcuticular, and buried catgut, in plastic operations on perineum, 1434—ab
Stock taking and prospect, 138—ab
Stokes-Adams Disease: See Adams-Stokes Disease
Stomach: See also Gastric
Stomach analysis, in pellagra, 1669-ab
  anatomic changes in, with gastric crises of tabes, 1440—ab
  and gynecologic disorders, 420—ab
  capacity of infants, 1694—ab
  conditions affecting discharge of food from, 1514—ab
  contents, determination of trypsin in, after oil test meals, 1964—O
  contents, macroscopic and microscopic appearances of, 1710—O
  contents, uses and limitations of *examinations* of, 1960—O
  crises, operative treatment of, by resection of seventh to tenth posterior dorsal roots, 492—ab
  deficiency of hydrochloric acid in, 1949—ab
  dilatation of, acute, 1770—ab
  dilatation of, acute, following surgical operation, 226—ab
  dilatation of, acute postoperative, 741—ab, 1223—ab, 1511—ab
  dilatation of, with extreme cyanosis, 977—ab
  disorders, amount of pepsin in, 77—ab
  disturbances, periodical, 420—ab
  functioning and for control of therapeutic *measures, Sahli's* desmoid reaction as practical test for, 1140—ab
  hair ball or hair cast of, in children, 617—O
  hyperacid, 1943—ab
  lavage, 1047—ab, 2035—ab, 2177—ab
  lesions, non-malignant, surgical treatment of, 980—ab
  lesions, operative treatment of, 492—ab
  motor functioning of, 154—ab
  organic diseases of, primary, differentiation of reflex dyspepsias from, 228—ab
  pathogenesis of round ulcer of, 1331—ab
  perforation of, and duodenal ulcer, 1865—ab
  peristalsis of, visible, 1241—ab
  primary organic diseases of, differentiation of reflex dyspepsia from, 743—ab
  relations of, to total work of digestion, 486—ab
  submucous connective tissue of, *diffuse* hypertrophy of, 87—ab
  Ulcer of: See Gastric Ulcer
  ulceration of, and necrosis of salivary glands resulting from experimental injection of bile salts, 2036—ab
Stomatitis, ulcerative, with Vincent's bacillus, 896—ab
  unusual type of, in infant, 976—ab
Stomatology, present status of, 339-O
Stools, bacterial examination of, in suspected gastric cancer, 1525—O
  of new-born, significance of, 140—ab

Strabismus, necessity for early treatment of, 1765—ab
Straw mattress urticaria, 1058—ab
Street cars, no medicine ads in, 1159—ab
  numbers, in Chicago, changes in, 463—E
Sreptococcus n 80 consecutive cases of diphtheria 2134—ab
  infections, phagocytic immunity in, 2131—ab
Strophanthin, crystalline, 1692—ab
  intravenous administration of, in other than cardiac disease, 813—ab
  intravenous injection of, 153—ab
  intravenous use of, in broken compensation, 1594—ab
Strychnin adrenalin as antidote to, 1950—ab
Student and teacher, personal relations of, 586—ab
Students, foreign, limitation of, at Strasburg medical clinics, 2111
  French, in American and English universities, 1653
Students' number of London Lancet, 1063—ab
Studies and their effects on nervous system, 1322—ab
Stuttering: See Stammering

Subnormal, mentally, responsibility of, 1403—E
Suckling and cancer, 983—ab
Suction apparatus as aid in surgery, 980—ab
Suffering, future, life tables cannot be used in estimating, largest verdict, 1510
Sugar and formation of glycogen, 749—ab
  in urine, improved quantitative test for, 660—ab
Suggestion, pseudocoxalgia relieved by, 1433—ab
Suicide, insanity and injuries, expert opinions as to nature and manner of, 1689—ab
Sulphhemoglobinemia, rare forms of, 484—ab
Sun baths, injurious action of, 1066—ab
Superman, evolution of, 77—ab
Superstitions, vitality of, 1192—E
Suppuration, and antiseptic vs. aseptic methods of operation, 2178—ab
  chronic, of maxillary antrum, treatment, an operation and new instruments, 238—ab
  thyroid, in typhoid, 1630—ab
Suppurations, joint, in infants and young children, 608—O
  treatment of, with antiferment, 751—ab
Suprarenal extract, cumulative effects of, 396, 576
  functioning, derangement of, in infectious diseases, 2137—ab
  preparations, intravenous injections of, in collapse, 422—ab
  preparations in gynecology, etc., 754—ab
  theory of osteomalacia, 1068—ab
  therapy, 2136—ab
  treatment of osteomalacia, 823—ab
  treatment of uncontrollable vomiting of pregnancy, 1524—ab
Suprarenalin, 2101
Suprarenals and sexual characteristics, 901—ab
  insufficiency of, diagnosis and treatment of, 594—ab
Surgeon, failure of, to give promised notice of changed condition of patient, company maintaining hospital not liable for, 2032
  responsibility of, in gynecologic conditions, 818—ab
  right of, as to protection of patient in operating room, 321—ab
  specialist, arrogant, protest against, 1501—C
  sponge left in abdomen by, assistant not liable for, 2033
Surgeons and hospitals of United States, Pozzi's report on, 216
  militia, field training of, 1814—O
Surgery, anorectal, local vs. general anesthesia in, 1682—ab
  cerebral, 617—ab
  Chinese, 635—ab
  conservative, for diseases of mandible, 444—O
  conservative, in ocular injuries, 1590—ab
  dental, anesthetics for, 446—O
  esophageal, experimental intrathoracic, 1975—O
  of our small hospitals, plea for, 1681—ab, 2131—ab
  of pelvic organs, conservatism in, 147—ab
  progress in, 818—ab
  protection of hands in, 1654—ab
Surgery, seamy side of, 139—ab, 1136—ab
  tuberculous toxemia in, 1505—ab
  wet dressing in, 1467—O
Surgical and medical work, advances in, 402—ab, 656—ab
  diseases, conditions simulating, 1505—ab
  profession in America, 594—ab
  technic, 228—ab
  work, elements of success in, 1505—ab
Suture, alternating, for enteroanastomosis, 242—ab
  basting, in gastroenterostomy, 325—ab
  buttonhole, continuous series of knots, 88—ab
  line, transplanted flaps to reinforce, 1701—ab
  new, 1135—ab
  rapid interlocking, 1334—ab
Sutures, buried, herniotomy without, 656—ab
Sweating, facial, localized, following certain olfactory stimuli, 207—O
  localized, 395—C
Sympathectomy, cervical, and secreting function of epithelial cells of thyroid, 424—ab
Syncope, attacks of, with prolonged arrest of whole heart, 977—ab
Syphilis, acute anterior poliomyelitis due to, 405—ab
  acute anterior poliomyelitis due to, and thrombosis of cervical anterior median spinal artery in, 1516—ab
  and aneurism, 2178—ab
  and gonorrhea contamination, efficient means of checking, 1844—ab
  and headache, 1870—ab
  and infant mortality, 2123—ab
  and negro, 1420—ab
  butyric acid test for, in diagnosis of metasyphilitic and other nervous disorders, 591—ab
  cerebrospinal, causing internal hydrocephalus and symptoms of cerebellar tumor, 1286—O
  congenital, importance of serodiagnosis of, 419—ab
  danger of transmission of, in modern infant asylums, 418—ab
  diabetes due to, is there? 246—ab
  diseases of central nervous system due to, clinical diagnosis of, 289—O
  evolution of, clinical study of, 1130—ab
  hereditary, 83—ab
  hereditary transmission of, 1523—ab
  infection and hemolytic jaundice, 1871—ab
  inherited, frequency of, at Berlin, 749—ab
  inherited, spasmodic paralysis in, 1697—ab
  inherited, statistics of, 419—ab
  intramuscular mercurial injections in, 477—ab, 1233—ab
  inunctions vs. injections of mercury in, 674—O
  necessity of isolating prostitutes with, to prevent propagation of the disease, 1844—ab
  nerve involvement by, plus toxic action of potassium iodid causing neurotoxic purpura hemorrhagica, 1059—ab
  of aorta, serodiagnosis of, 2137—ab
  of joints, 495—ab
  of kidneys during pregnancy and confinement, 1143—ab
  of liver, 1122—ab
  of liver, unusual forms of, 2035—ab
  of muscles, testicles or conjunctiva, 1440—ab
  of nose, suggestions for operative correction of, 409—ab
  parasitology of, 757—O
  phlebitis due to, 1139—ab
  possibility of immunization against, by other venereal disease, 2140—ab
  precipitin tests for, 1535—O
  precocious tertiary, case with manifold manifestations, 1511—ab
  pseudoparalysis due to, 918—O
  quaternary, osteopathies of, 1236-ab
  reinfection with, 767—ab
  resembling pityriasis rubra pilaris, 947—O
  serodiagnosis in eye lesions of, 2138—ab
  serodiagnosis of, 155—ab, 242—ab, 495—ab, 742—ab, 934—O, 936—O, 948—O, 1242—ab, 1532—O, 1535—O, 1537—O, 1596—ab, 1780—ab, 2036—ab
  serodiagnosis of, active serums for, 1699—ab
  serodiagnosis of, improved technic for, 749—ab
Syphilis, serodiagnosis of, in pregnant women and new-born infants, 87—ab, 242—ab
  serology of, 891—ab
  serum, active and inactive in complement-deviation test for, 2036-ab
  tertiary, lupus and cancer, differential diagnosis of, 981—ab
  transmission of, by vaccine, 1844-ab
  treatment of, 618—ab
  treatment of, by mercurial inhalations in proper hot room, 1943-ab
  treatment of, duration of, 1433—ab
Syphilitic eye lesions and tuberculosis, 2138—ab
Syphilology, research work in, 818-ab
Syringomyelia, monoplegic, 1065—ab
  throat symptoms in, 1065—ab

CURRENT MEDICAL LITERATURE

INDEX OF SUBJECTS

Explanation: The *reading matter which appeared in* The Journal *is not indexed here*, except the original articles and the abstracts of original articles. This index refers to the titles and the subjects of original articles published in the leading medical journals of the world, including The Journal, during the past six months. The titles of the articles and the names of the journals in which they appeared were listed weekly in the Current Medical Literature Department, and it is to them that references are here made. The figure in parenthesis refers to the paragraph; the number following to the page in The Journal. For instance, "Abdominal Tuberculosis, Surgical Types of, (66) 972—ab," refers to page 972 of The Journal, on which is found, in paragraph numbered 66, the title of the paper and the name of the author, viz., "Surgical Types of Abdominal Tuberculosis. W. D. Haggard." This title is listed under the journal in which the article appeared, the *Journal of the Tennessee State Medical Association*, August, 1909. When "ab" follows a page number it indicates that the article was abstracted in The Journal; for instance, "Abdominal Surgery, Prevention of Adhesions in, (54) 323—ab." On page 323, paragraph 54, will be found an abstract of this article, which appeared in *Surgery, Gynecology and Obstetrics* June, 1909. Titles of articles which appeared originally in The Journal are indicated in the index by an asterisk (*) before the page number; for instance, "Acanthosis Nigricans, *1369," refers to page 1369 of The Journal, on which is found the complete original article. The index to authors of all articles, both original and those listed under Current Medical Literature, appears separately on pages 2271 to 2286 of this index.

  skeleton, in, (21) 1237
Achylia-gastrica, (101) 817
  and anacidity, pancreas in, (93) 65—ab
  and carcinoma, (73) 1951—ab
  and insufficientia pylori, (15) 653—ab
  with anemia, (103) 1242—ab
Acid: See also Acids
Acid, aceto-acetic, decomposition of, by enzymes of liver, (41) 1232—ab
  B-oxybutyric, decomposition of, by enzymes of liver, (41) 1232—ab
B-oxybutyric, detection of, in urine, (57) 144
  butyric, test, for syphilis in diagnosis of metasyphilitic and other nervous disorders, (46) 591—ab
  camphor-glycuronic, pairing of, dependence of, on normal functioning of liver, (151) 825
  Carbolic: See Phenol
  citric, production of, by citromyces, (17) 2179
  cresotinic, action of, (36) 1336
  elimination of, in diabetes, influence of food and fever on, (102) 823
  glutaric, action of, in phloridzin diabetes, (111) 1555
  hydrochloric, deficiency of, in stomach, (41) 1949—ab
  hydrochloric, free, not in stomach, (8) 142, (28) 1860
  hydrochloric, influence of hydrogen peroxid on secretion of (19) 1777—ab
  indoxylsulphuric, in urine, practical test for, (7) 1430—ab
  Intoxication: See also Acidosis
  intoxication, (46) 1337
  iodbenzoate, pharmacologic action of, (101) 1060
  iodosobenzoate, pharmacologic action of, (101) 1060
  lactic, and general metabolism in infants, (67) 661—ab
  lactic, bacteria, in chronic suppurative nasal conditions, (9) 411—ab
  lactic, in blood and urine in epilepsy and eclampsia, (61) 596—ab

Acid, lactic, therapy in gastrointestinal and metabolic disturbances, (106) 1142
  mixtures, alkali-pyrogallic, device for cultivation of anaerobes in plate cultures by use of, (71) 1862
  nucleinic, immunizing action of, (82) 980
  oxalic, food rich in, and poor in lime, changes in bones of young animals on, (81) 662
  oxyiodosobenzoic, pharmacologic action of, (101) 1060
  salicylic, history of introduction of, into treatment of acute articular rheumatism, (110) 1142
  salicylic, influence of isomers of, on metabolism, (120) 1235—ab
  toluic, action of, (36) 1336
  uric, treatment of, (26) 490—ab
Acidity, hydrochloric, of gastric contents, diagnostic significance of variations in, (46) 1512
Acidosis: See also Acid Intoxication
Acidosis, is diabetic coma due to? (1) 1860—ab
  postanesthetic, (92) 146
  relation of, to carbon dioxid of blood in diabetic coma, (4) 238
Acids and gasses, rate of autolytic reaction and appearance of, in autolysis of so-called sterile livers of dog, (72) 1862
  aryl-stibinic, action of, in experimental trypanosomiasis, (49) 240
  fat in stomach content, (94) 1953
  fatty, phenyl derivatives of, mode of oxidation of, in animal organism, (48) 486
  fatty, unsaturated, influence of, in tuberculosis, (13) 1696—ab
  oxyiodosobenzoic, iodbenzoate and iodosobenzoate, pharmacologic action of, (101) 1060
Acne, concrete sebaceous, or senile keratoma, radium therapy in (61) 1064
  indurata, (87) 79
  rosacea, electrolytic *scarification* for, (150) 905
  vulgaris, bacteriology and vaccine treatment of, (13) 1063—ab
Aconite poisoning, (122) 1336
Aconitin, irregularities of mammalian heart observed under, and on electric stimulation, (38) 898—ab
Acoustic function of ear, (40) 77
Acromegaly, (24) 81, (20) 820
  operative treatment of hypophysis tumor in case of, (36) 1949—ab
  pathology and pathogenesis of, (76) 1785—ab
Actinobacillosis, actinomycosis and botryomycosis methods of staining common to, (32) 658
Actinomycosis, actinobacillosis and botryomycosis, methods of staining common to, (32) 658
  clinical and bacteriologic study of, (65) 1785
  cutaneous, (7) 975
  of female sexual organs, (80) 901
  systematic, (95) 236
  treatment of, at Wölfler's clinic, (56) 1065—ab
  with apparently direct contagion, pathology and clinical history of, (113) 80
Action and habit, results of uniformity of, (32) 1237
Adactylia involving both hands and left foot with right amelus, (146) 326
Adams-Stokes disease, (104) 973
  disease and heart block, (98) 1699—ab
  disease, cardiac asthma, Cheyne-Stokes respiration and bradycardia, (100) 146, (112) 1135, (146) 1599
  disease, treatment of, (73) 655
Addendum prandii and professional education, (25) 1696
Adder or viper bite, (14) 1237
Addison's-disease, acute, *after thrombosis* of both suprarenal veins in patient with gastric cancer, (93) 1340
  and internal secretions, (133) 1143—ab
  metabolic findings in, under suprarenal treatment, (142) 246
  organotherapy in, (47) 1783—ab
  possible incipient, (45) 328—ab
  protein metabolism in, (72) 413-ab
  pseudoperitonitis from, (99) 1521
Adduction and abduction, congenital absence of, voluntary recession of globe with simultaneous contraction of lid fissure, (124) 1336
Adenitis, tropical form of, apparently due to unrecognized organism, (20) 81
Adenitis, tuberculous, of bronchial lymph glands, probably causing intermittent atelectasis, (45) 323
Adenocarcinoma, ovarian papillary, with polypous metastasis in uterus, (173) 1343
  of cervix, colloid, (71) 1519
  uterine, (52) 1697
Adenofibroma of male breast, (111) 817
Adenoid and tonsil operations, anesthesia for (11) 411—ab
  and tonsil, tuberculous infection through, (19) 653
  hypertrophy, colic in infant due to, *1188
  hypertrophy during infancy and its treatment, *605
  operations, *695
Adenoids and asthenopia, (25) 1436
  and nasal obstruction, *tubinectomy* for, (43) 1332
  and nocturnal enuresis, (28) 746
  and tonsils, operations for, acute mastoiditis with lateral sinus suppuration and cerebellar abscess as complications of, (8) 327
  causes, dangers and treatment, (150) 744
  clinical manifestations of, in adults, *1013
  diagnosis of, in children and adults, (39) 893, (131) 1599
  hemophilic hemorrhage after removal of, (69) 1785
  postnasal, etiology, symptomatology, diagnosis and treatment, (31) 143
Adenoma, malignant thyroid, multiple metastases of, (88) 2044
  of uterus, involvement of rectum in, (140) 333
  true umbilical, and primary bilateral mammary carcinoma, (62) 401
  umbilical, (72) 84
Adenomata, multiple, of rectum, (58) 1432
Adenomyoma of uterus, (39) 746
Adenopathy in infections of buccal region, (92) 1135—ab
Adenosarcoma of kidney, embryonal, (46) 2131
Adhesions and contractures, cicatricial palatopharyngeal, new plastic operations for, (46) 653-ab
  peritoneal, (9) 892
  peritoneal, significance of, after operations, (55) 323
  prevention of, in abdominal surgery, (54) 323—ab
Adnexa: See Ovaries and Fallopian Tubes

  spinal, accidents with, (138) 754—ab
Anesthesia, spinal, bacteria in tablets for, (117) 494—ab
  spinal, by stovain-glucose solution, (17) 1137
  spinal, elimination of stovain after, (35) 1336
  spinal, especially for laparotomies, (71) 84
  spinal, followed by sudden death, (86) 487
  spinal, in children and infants, (31) 1437, (32) 1517
  spinal, influence of, on contractions of uterus, in labor, (75) 1519—ab
  spinal, in rectal surgery, (46) 1432
  spinal, mode of diffusion of anesthetic in, (133) 904—ab
  stovain, spinal, trophoneurotic lesions after, (92) 420
  venous, *384, (3) 1695, (105) 1788-ab
Anesthesias, general, analysis of (118) 1336
Anesthetic bill, general, British, 1908, (54) 240
  chloroform as, in throat operations, (124) 818—ab
  effect of local applications of solutions of magnesium sulphate and other salts, *1892
  ethyl chlorid as general, (74) 1693
  ethyl chlorid as general, in throat operations, in children, (5) 1594-ab
  local, quinin and urea hydrochlorid as, *1393
  mode of diffusion of, in spinal anesthesia, (133) 904—ab
  technic, advance in, as practiced at Sisters Hospital, Hot Springs, (32) 970—ab
Anesthetics, (30) 1138—ab
  for dental surgery, *446
  in general practice, (8) 81
  in hospitals and private practice, (85) 1597
  need of legislation in regard to, (11) 1865—ab
Anesthetist, evolution of, (42) 1332
  general practitioner as, *768
  nurse as, (128) 147—ab
Aneurism, abdominal, treated by wiring, (137) 325—ab
  and murmurs in pulmonary artery, (83) 1951
  and syphilis, (6) 2178—ab
  aortic insufficiency simulating, and review of various opinions on cause *of Flint murmur, (56) 78—ab*
  descending thoracic, symptoms of, (52) 144
  large in Scarpa's triangle, presentation of case three years after ligation of common femoral artery for, cure, (109) 1780
  of axillary artery after dislocation of humerus, (106) 1340
  of thoracic aorta, (2) 232—ab
  or mediastinal tumor, auscultation of bronchial breathing over thorax as sign of, (129) 753—ab
  perforation of aortic, into superior vena cava, (185) 1344
  popliteal, (33) 898—ab
  subclavian, successful ligation in first surgical division, (146) 818
  thoracic, spontaneous cure of, (3) 489—ab
Aneurisms, embolomycotic, *1808
  in young people, (122) 744—ab
  innominate, treatment of, by distal ligature, a Brasdorwardrop operation, (56) 1517—ab
  multiple, of aortic arch and thoracic aorta, (4) 416—ab
  popliteal, *381
Angina, Ludwig's and parotitis, with severe facial carbuncle, (16) 593
  Ludwig's, bacteriologic findings, (68) 486—ab
  pectoris, (64) *1513*, (14) 1695
  pectoris, diagnosis of, (29) 1943—ab
  pectoris, treatment of, (26) 815
  pectoris, true and false, (9) 1132
  phlegmonous, and diphtheria, differential *diagnosis* of, (67) 241—ab
  symptoms of, with paroxysmal tachycardia, *717
  Vincent's, (33) 77
  Vincent's, communicability of, (106) 488—ab
  Vincent's, micro-organisms of, mastoiditis due to, *116
Anginas, pseudomembranous, Vincent's spirillum and bacillus fusiformis in, *373
Angioid streaks in retina, (73) 1780
Angioma, congenital, and deformities in bony frame of face, (63) 1139
  of brain, plexiform, plus tuberculous meningitis, (118) 1142
Angiosarcoma of kidney, (30) 827
  treatment of, with carbon-dioxid snow, negative results of, (132) 246
Angiosarcoma of left heimsphere, (119) 1781
  or orbit and flat sarcoma of uveal tract, (70) 1780
Angiosclerosis, pathogenesis of, (99) 1787
Anglo-American Medical Association of Berlin, (130) 1236
Anguish states and phobias, (63) 748-ab
Anilin, visual disturbance due to use of hair dye containing, (68) 815
Animal experimentation, active bacterial immunization in, (134) 897-ab
  inoculations, freak results from, (171) 1436
  membrane, use in producing mobility in ankylosed joints, (103) 1598—ab
  therapy, in skin diseases, and cutaneous manifestations of diseased *ductless glands*, (87) 2038
Animals, and man, cancer in, (1) 1137—ab
  experiments on, relative to question of abdominal supporters after *laparotomy*, (118) 1863
  thyroidectomized, survival of, when given calcium or magnesium (62) 900—ab
  young, milk as exclusive diet for, influence of *heating on nutrient* value of, (45) 1600—ab
Ankle and knee joints, injury to, (59) 2037
  tuberculosis of, resection, (130) 1341
Ankylostoma-duodenale, alleged hetergenesis in, (3) 1946
  life-history of, (29) 1336
Ankylostomiasis, (74) 330, (35) 653
  among Queensland children, (27) 1138
  and its complications in eastern Bengal, (15) 1865
  behavior of nitrogen and iron in two cases of, (112) 1441
Annulare, granuloma, (126) 1236
Anodynes, coal-tar, action of, (48) 1861—ab
Anomalies, congenital, blue disease from, (58) 418
Anomaly of genitourinary tract, *299
Anophelesis, new name for malaria, (13) 1231—ab
Anopsia ex amblyopia, its nature and treatment, (105) 973
Anthracosis, pulmonary, mode of infection, (112) 494
Anthrax, pustule simulating, due to organisms of porteus group, (18) 81
Antibodies and complement deviation, (39) 1237
  and opsonins, (154) 248—ab
  circulating, in cancer, parabiosis as test for, (37) 2131—ab
  in hydatid cysts, (62) 979
  in tuberculosis, and their relation to tuberculin inoculation and vaccination, *2092
Antibody, anaphylactic, determination of, in serum of persons with cancer, (116) 752—ab
Antienzymes and protolytic enzymes of normal and pathologic cerebrospinal fluids, (76) 1333—ab
Antiferment, treatment of suppurations, (106) 751—ab, (45, 57) 1950, (86) 2044
  treatment of suppurations in infants, (45) 1950
Antiferments and ferments, proteolytic, determination of, (65) 2043
  proteolytic, in acute suppurations, (86) *2044*
Antiformin, enrichment of tubercle bacilli by, (60) 1784
  in examining for microparasites in secretions and excretions, (92) 493
Antigen in pellagra, complement-fixation with lecithin as, *1187, (14) 1942—ab
  syphilis, seroreaction in leprosy with, (75) 2137
Antigens and fixation reaction or deviation of complement, (39) 1237
Antigonococcus: See Gonococcus
Antihemolysis and auto-antibody formation, ([illegible]5) 1332
Antimalaria: See Malaria
Antimenigitis: See Meningitis
Antiphagins of microbe of fowl cholera, (18) 2179
Antisepsis and asepsis in surgery, (141) 326
  of skin with tincture of iodin, (61) 83—ab
Antiseptics, intestinal, and bacterial contents of feces, (28) 1778—ab
  intestinal, action of, on peptic di*gestion*, *1451
Antiserums, tests of, importance of monkeys for, (83) 84—ab

Antitoxin and diphtheria, (64) 153—ab
  and precipitinogen, elimination of, through mammary gland of passively immunized mothers, (103) 1870
  cholera, influence of intravenous injections of, on course of disease, (136) 423
  diphtheria, abnormal reaction to, (114) 663
  diphtheria, effect of, on tuberculo-opsonic index, (12) 327—ab
  diphtheria, exceptionally large doses of, in malignant sore-throat and diphtheritic paralysis, (57) 1238-ab
  diphtheria, injection of, threatening collapse after, (73) 1140—ab
  diphtheria, intravenous injection of, (118) 903
  diphtheria, non-specific uses of, (6) 1776—ab
  diphtheria, untoward results from, in asthma, (65) 1332—ab
  in prophylaxis of diphtheria, (158) 826
  in tetanus, (26) 897
  of cobra venom, mechanism of, neutralization of cobra venom by, (64) 592
Antitoxination and intubation in worst forms of laryngeal diphtheria, (98) 817
Antitrypsin content of blood serum in mental derangement, (81) 2138
  content of infant's serum, (111) 1142
  determination of, in blood, (70) 661—ab
  importance of determination of, in puerperal conditions, (138) 423-ab
  importance of, in blood serum, for diagnosis and prognosis, (59) 1951
  nature of, in serum and mechanism of its action, (99) 1067
  serum, nature of, (48) 1950
Antitryptic index, diagnosis of malignant disease by, (3) 1782—ab
Antituberculosis: See Tuberculosis
Antityphoid: See Typhoid
Antivenom in treatment of viperine snakebite, (31) 590
Antrum-maxillary, (101) 1780
  chronic suppuration of, operation for, and new instruments, (8) 238
  empyema of, relation to other diseases and its treatment, (2) 1594
  endothelioma myxomatodes of, (12) 593
  methods of opening, and new instrument, (46) 1058
  surgical treatment of, (83) 1780
Anus and rectum, examination and diagnosis of diseases of, (27) 1691
  and rectum, fibroma of, (152) 1061
  and rectum, prolapsed, successful rectococcygopexy for, (109) 2139
  artificial, following operation for intussusception, three years' complete occlusion of large bowel, method of restoring continuity, (68) 1944—ab
  artificial, resection of intestine in, technic of, (76) 84
  artificial, treatment of, (120) 245
  imperforate, (128) 818
  mechanism of sphincter of, (100) 1521—ab
  vaginal, in adult, (47) 1432—ab
Aorta and heart, treatment of chronic degenerative lesions of, (10) 489-ab
  aneurism of, *perforation of, into* superior vena cava, (185) 1344
  arch of, and thoracic aorta, multiple aneurisms of, (4) 416—ab
  dilatation of, diagnostic importance of diastolic murmurs in, (129) 422
  dilatation of, diastolic murmurs in third left interspace sign of, (157) 1343
  elastic fibers of, changes in, with advancing age, (74) 1862—ab
  necrosis of, under influence of suprarenal preparations, (132) 1143
  negative action of tobacco smoke on, in tests on rabbits, (105) 155
  relative incompetency of, of muscular origin, (115) 415—ab
  serodiagnosis of syphilis of, (69) 2137—ab
  suture of, (137) 1136
  thoracic, and aortic arch, multiple aneurisms of, (4) 416—ab
  thoracic, aneurism of, (2) 232—ab
Aortic-insufficiency, pupil sign of, (68) 900—ab
  simulating aneurism and opinions on cause of Flint murmur, (56) 78-ab
  without murmur, (83) 242—ab
Aperients, saline, metallic balance in, (53) 1238
Apes, anthropoid, mind of, (104) 1601—ab
Apex beat, (152) 423—ab
  beat, displacement of, with mitral defect, (148) 1524
Apex beat, location of, (76) 1541—ab
  congestive edema at, simulating *tuberculosis, (44) 659—ab*
Aphasia, (132) 87, (74) 412, (152) 657
  hysterical, (52) 401
  interpretation of, (31) 1777
  motor, and speech center, (155) 158
  motor, as sequel to scarlet fever, *208
  motor, localization of, (89) 1521—ab
  prophylaxis of, (23) 1138
  *somnolence and mental hebetude fol*lowing nasal operation (80) 655
  succeeded by Jacksonian epilepsy, *operation, recovery,* (9) 238
Aphrodisiacs, new, (151) 1061—ab
Apomorphin as hypnotic, (150) 238-ab
Apoplexy, traumatic, late, (11) 1947
Apparatus for application of plaster-of-Paris bandages, (141) 80
  for artificial respiration and aspiration of air from chest, (97) 663
  for automatic fixation and embedding of microscopic specimens, (71) 2043
  for chemical and bacteriologic examination of gastric contents and feces, (19) 1132—ab
  for dropping ether and chloroform, *1817
  for ether-drop anesthesia, pedal arrangement for, (77) 492
  for etherization in operations about face and upper air passages, *1353
  for fractures of humerus, *375
  for general anesthesia with ethyl chlorid, (65) 1519
  for localizing foreign bodies in eyeball by x-ray, (70) 2132
  for metabolism experiments in male infants, *1818
  for proctoclysis at even temperature, **2160*
  for rectal anesthesia, *1559
  improved eye-bandage, *1487
  inexpensive suspensory, for Pott's disease, *1637
  laboratory, convenient, (93) 1060
  leather, *for extension,* (85) 154
  modified Cornell x-ray tube, *29
  modified, for fracture of clavicle, *31
  new food scale, *457
  operating-table, *948
  or electricity in treatment of peripheral muscular atrophy, (49) 1139
  over-pressure for reviving asphyxiated new-born infants, (101) 1953
  oxygen generator and inhaler, for use in mountain sickness, (8) 2178—ab
  portable extension, for fractures, (167) 1343
  portable, for positive pressure, (127) 246
  portable, value of, in orthopedics, (56) 1784
  saline transfusion improved, *2160
  spring brace for deformity of spine, (118) 1068
  suction, in surgery, (75) 980—ab
  test-tube rack used in preparation of Loeffler's blood serum, *382
  urologic test-tube holder, *1819
  vocalizing, extirpation of larynx fitted with, (18) 1695
  walking, in treatment of fracture of tibia, (52) 1784—ab
Appeal for help in tuberculosis problem, (1) 2176
Appendectomies, interval, danger in, (35) 2035
Appendectomy, with immediate suture, *(89) 2044*
  subserous, (101) 1515—ab
Appendicitis, (59) 486, (54) 592, (95) 817—ab, (127) 818—ab, (33) 1512
  acute, advisability and method of early operation in, (1) 416
  acute, *early operation in, (17)* 658-ab
  acute, gangrenous, (49) 143
  acute, Henoch's purpura with symptoms like, (95) 742
  acute, rupture of right parovarian cyst simulating, (133) 1341
  and diseases of adnexa, (116) 1522—ab, (76) 1944—ab, (34) 2041
  and gall-bladder diseases, chronic, similar symptomatology, (81) 1944
  and inguinal hernia, combined operation for radical cure of, (13) 143—ab
  and pelvic disease, differential diagnosis of, (60) 486
  and tubal disease, differential diag*nosis, (76) 1944—ab*
  at Christiania, (155) 247
  chronic, (71) 145
  chronic, and cancer of appendix, (59) 83—ab
  chronic, artificial dilatation of stomach and colon aid in diagnosis of, (66) 2037
  chronic, as etiologic factor in other conditions, (68) 2037—ab
Appendicitis, chronic, cause of dysmenorrhea, (131) 897
  chronic, hematuria in, (68) 145
  chronic, in children, (60) 418
  chronic, incarceration of cecum with, (100) 494
  complicated by general peritonitis, (25) 741

  no mortality, résumé of progress toward, (56) 592
  Ochsner treatment of, (75) 487
  of twenty years standing, *718
  operation early, in, (65) 2137—ab
  operative cases of, analysis of (72) 324
  origin of, (134) 1523—ab
  origin of ileus after, (81) 1066—ab
  painful spots in, (43) 1437—ab
  pathogenesis of, (81) 980
  perforative, acute, recovery, (83) 2038
  perforative, complicating pregnancy, (109) 1694—ab
  simplicity in operations for, (39) 1512
  six consecutive cases of, operated on, (23) 1948
  surgical treatment of, (135) 1336, (99) 1515—ab
  symptoms in incipient pneumonia simulating, (142) 1342—ab
  treatment of, (144) 1136
  treatment of, in navy, (98) 1335
  undescended testicle complicating, (34) 970, (112) 1515—ab
  unusual features in, (23) 976—ab
  with pus and peritonitis, (62) 1059
  with transposed colon, (140) 88
Appendicostomy, (94) 656, (92) 895—ab, (162) 1137
  and amebic dysentery, (84) 414
  and suture, in traumatic rupture of small intestine, recovery, (5) *1599*
  as aid in treatment of malignant and intractable dysentery, (63) 1432
  for various forms of colitis, (3) 1864
  or colostomy in chronic diarrhea, *(79)* 742
  technic of, (126) 246
Appendix, abnormally long, *1100
  abscess, complicated by thrombosis of popliteal and tibial arteries, (123) 80—ab
  abscesses, diagnosis and localization of, (6) 321—ab
  acquired diverticula of, (80) 2138
  acute rupture of, peritonitis, operation, recovery, (37) 151
  and colon, diagnosis of inflammations of, (55) 654
  and ovary removed four hours after an accident, pathology of, (52) 1512
  cancer of, and chronic appendicitis, (59) 83—ab
  carcinoma of, (8) 178, (17) 1782
  colics of, (44) 970—ab
  containing foreign body incarcerated in hernial sac in child, (9) 745
Appendix, cyst of, (102) 1433
  diseased, hemorrhage in, (102) 331
  examining and if necessary removing, in abdominal section, (127) 147—ab
  fat, (65) 891
  fibroid degeneration of, (110) 1515
  440 operations on, (75) 1944—ab
  foreign bodies in, (101) 331
  in status lymphaticus, (125) 904
  incarceration of, in hernial sac, (9) 745, (126) 983
  inflammation at base of, causing invagination of bowel, (71) 972
  inflammatory swellings around, simulating neoplasm, (136) *1244*
  location, pathognomonic signs as relating to, (39) 1595
  normal, removal of, (25) *2040*
  oxyuris vermicularis found in, in appendicitis, (80) 1513
  perforation of, by round-worm *1029
  pseudotumors in region of, (73) 84
  pus, (100) 1515—ab
  pus in, treatment of, (25) *1860*
  saucepan sliver in, (81) 1520
  serious troubles it may cause, (62) 1512
  shot in, *1289
  surgical, (15) 322—ab
  use of, to splice ureter, *717
  where is it? (111) 1515
Appetite, good, and supervising *weight, importance of, during* mercurial treatment, (90) 1786
Appliances improvised on sick-bay *bunks, (63) 654*
Aqueous humor, occurrence of opsonins in, (63) 815
Archiv, fifty years of the, (47) 418
Area, pre-Rolandic, sensory functions of, (81) 1234—ab
Argyrol sealed in urethra, beginning gonorrhea quickly cured by, (90) 2038—ab
Arm and *forearm, congenital* telangiectasis of, (121) 2038
  adherent, plastic operation to free, (118) 2038
  and shoulder, paralysis, with cervical ribs, (87) 901
  fracture of, during delivery, radial paralysis after, (106) 1068
  influence of soft tissues of, on clinical blood-pressure determinations, (76) 413—ab
  paralysis of, treatment, (99) 155—ab
  successful transplantation from, in epithelioma of lower eyelid, (160) 745—ab
  upper, fractures of, treatment of primary radial paralysis in, (117) 1341
Arms, occupation neuroses and neuritis in, treatment of, *198
Army recruits, physical training of, (7) 897
  sanitary administration in U. S. and tropics, (72) 2132
Arrhythmia and tachycardia, paroxysmal, (48) 1867

  how long after death or amputation can it be kept for transplantation purposes? (77) 1339
Bone, involvement of, in pavement epithelium cancer, (75) 1869
  operation, result of, on tetany parathyreopriva, (71) 592
  pathology and general pathology, (132) 80
  sarcoma, (83) 1597
  semilunar, isolated fracture of, (61) 1139
  sesamoid, vs. loose body in outer head of gastrocnemius, (16) 485
  subcutaneous and intramuscular neoformation of, by injection or implantation of an emulsion of periosteum, (73) 492—ab
  tissue, transplanted, partial sequestration of, (67) 83
  transference, (107) 236, (128) 1515—ab
  transplantation of, to remedy defects in long bones, (62) 1139
  transplanted, histology of, (87) 1339
  tuberculosis, Cuguillere's serum in, (152) 237
  tuberculosis, importance of early recognition of, (7) 322—ab
  tuberculosis, radiotherapy of, (110) 1871—ab
Bones and joints, differential diagnosis of pathologic conditions of, by x-rays, (114) 1598
  and organs, transplantation of, (89) 1603
  comparatively slight resistance of, to action of cold, (161) 1343
  extension of, adjustable drill for, (123) 1244—ab
  facial, complete detachment of, from cranium, with multiple fractures of sides and base of skull, (124) 744
  facial, deformities of, (148) 1599
  facial, fractures of, (77) 1780
  long, cysts of, (11) 1132—ab
  long, sarcoma of, conservative treatment of, (55) 748—ab
  long, transplantation of bone to remedy defects in, (62) 1139
  long, treatment of fractures of, (18) 1138—ab
  of legs, weight-bearing conditions in, (63) 1065
  of young animals, changes in, on food poor in lime and rich in oxalic acid, (84) 662
  skewering, arthrodesis by, (86) 1339
  suture and skewering of, (84) 1339
  tuberculosis of, in childhood, (37) 1133
Books, disinfection of, (50) 491—ab
Botryomycosis, actinomycosis and actinobacillosis, methods of staining common to, (32) 658
  in man, (53) 747
Bottle in rectum, *383
Bougie, fragmented, filiform, removed from male urethra without operation, (5) 1941
Bowel movements, loose, etiology of, (74) 1513
Bowels: See Intestines
Boy of fifteen, catalepsy in, (10) 238—ab
  of ten, diabetes in, (43) 323
Brace, spring, for deformity of spine, (118) 1068
Bradycardia, Cheyne-Stokes respiration and cardiac asthma in Adams-Stokes disease, (100) 146, (112) 1135, (146) 1599
  extreme, and acetonuria, with severe autointoxication (6) 143-ab
  nodal, (39) 898—ab
Brain, abscess and acute softening of, (39) 1332
  abscess and lateral sinus suppuration, with acute mastoiditis, as complications of operation for removal of tonsils and adenoids, (8) 327
  abscess, death from insufficient exploration, (159) 1137—ab
  abscess, diagnosis and surgical treatment of, (43) 1058
  abscess, encapsulated, (10) 410
  abscess, in pulmonary disease, (1) 1366—ab
  abscess or tumor, differential diagnosis of, (115) 1515
  abscess, tardy complications of, after successful operation, (114) 245—ab
  abscess, undiagnosticated, *632
  abscess with complicating meningitis, (99) 331—ab
  abscesses of otitic origin, (105) 79, (80) 324 (158) 1137
  and its coverings, surgery of, (109) 1514
  and mind, (5) 2039
  and nerve tissue, do saprophytes produce toxins which have elective attraction for and thus cause idiopathic diseases of these structures? (7) 1057—ab
  and posterior portions of medulla, pons and cerebral peduncle and posterior limb of one internal capsule, extensive gliomatous tumor involving, *2086
  and spinal cord, organic diseases of, and grave hysteria, differential diagnosis of, especially disease of parietal lobe, (100) 656
  arches, (6) 484—ab
  bullet in, removal and recovery, (10) 2038
  complications, indications for tympanomastoid exenteration in absence of symptoms of, *349
  complications of otitis media, *344, (42) 490—ab, (159) 745—ab, (122) 1515, (109) 2038
  concussion of, (100) 1787—ab
  concussion of, Korsakow's psychosis as result of, (84) 330
  cystic tumor of, in child, (159) 81
  disorders of circulation of, and their clinical manifestations, (43) 1237, (39, 42, 45) 1437
  disorders, psychometric methods in diagnosis, prognosis and treatment of, (45) 411
  extract, (61) 748
  gunshot wound of, (126) 744-ab, (53) 821
  hemorrhage of, in children, (151) 826
  hemorrhage, subdural, (11) 1947
  hemorrhages of, spontaneous, pathogenesis of, (47) 411
  injuries, penetrating, recovery, (133) 415
  injury, (133) 237
  lesions, segmented sensory disturbances in, symptomatic importance of, (67) 330
  localization, topography for, (103) 421
  motor area of, so-called function of, (1) 593—ab
  operations in posterior fossa of, (55) 1065
  perithelioma of, (83) 972—ab
  plexiform angioma of, plus tuberculous meningitis, (118) 1142
  pseudotumor in, (151) 905
  posterior superior portion of right parietal lobe of, astereognosis caused by tumor of, (102) 1915
  puncture, (78) 822
  rheumatism of, and chorea, (96) 1780
  surgery, (47) 234, (160) 819—ab, (86) 1597
  surgery, necessary failures in, (100) 1433
  surgery, puncture of corpus callosum in, (78) 1698—ab
  surgery, reasons for believing in and encouraging, (99) 488
  syphiloma in, diagnosis of, (79) 822
  third ventricle of, tumor in, (69) 1110
  tissues, disposal of waste of, (91) 146
  tumor, (77) 115, (148) 326—ab, (26) 970, (98) 1235, (54) 1697, (36) 1778—ab, *2078, *2086

Brain tumor, alterations in color fields in, (148) 1516
  tumor and brain, specimens of, (47) 1861
  tumor, and cerebral decompression for papilledema, (18) 2035
  tumor, diagnosis and treatment, (99) 414, (62) 742
  tumor in frontal lobe, (77) 822
  tumor in frontal lobe, simulating syndrome of tumor in posterior cranial fossa, (48) 659
  tumor, operation for, with hitherto unrecognized circulatory phenomena, (21) 1330
  tumor presenting unusual course, (36) 1778—ab
  tumor, rupture simulating, aneurism of left anterior cerebral artery with, (82) 1234
  tumor, successful removal of, *364
  tumor, symptoms indicative of, (99) 656
  tumor, unilateral optic neuritis from, (1) 489
  tumor, symptoms of, and internal hydrocephalus caused by cerebrospinal syphilis, *1286
  tumor, with statistics of 30 operations, (142) 1515
  tumor with unusual symptoms, (4) 652—ab
  tumors at base of, attempt to remove, (149) 496—ab
  tumors, diagnosis of, (98) 244—ab, (16) 892
  tumors, mental manifestations with, (131) 1143—ab
  tumors, multiple, with involvement of auditory nerves, (7) 416
  tumors, natural healing processes in, (82) 84—ab
  tumors, pathologic physiology of, (7) 410—ab
  tumors, status of our knowledge of, (120) 1243—ab
  tumors, surgery of, (55) 491—ab
  tumors which prove inoperable, method of combined exploration and decompression for, (114) 656—ab
Breakfast of school child, *1727
Breast and nipple, care of, during pregnancy and puerperium, (113) 237
Breast and uterus, malignant diseases of, early diagnosis of, and treatment, with Coley serum, (74) 79—ab
  cancer cysts of, and their relation to non-malignant cysts, *1475
  cancer of, (83) 414, (164) 415—ab, (84) 592, (165) 826—ab, (90) 1863, (3) 2129
  cancer of, and of tongue and organs of generation, short circuits of lymphatics in, (22) 417
  cancer of, castration in, 1341—ab
  cancer of, early diagnosis, (38) 1337
  cancer of end-results of operation for, (46) 2135—ab
  cancer of, serratus magnus infection in, (4) 1782—ab
  carcinoma of, acute, cause and diagnostic value of peau d'orange in, (4) 1336—ab
  carcinoma of, medullary, and streptoccus infection in pregnancy, (132) 147
  carcinoma of, metastases in, (84) 1059—ab
  carcinoma of, pavement epithelium, (142) 88
  carcinoma of, primary bilateral, and true umbilical adenoma, (62) 491
  complete removal of, for malignant growths, (133) 818
  diseases of, (139) 657
  female, intracanicular fibroma of, undergoing sarcomatous change, *1485
  lactating, checking secretion of, (79) 1597—ab
  male, adenofibroma of, (111) 817
  male, carcinoma of, (130) 1605—ab
  male, tumors of, (108) 1953
  nursing, care of, development during neurasthenic puberty, (4) 1511—ab
  nursing, need and incapacity for, (82) 901
  of passively immunized mothers, elimination of antitoxin and precipitinogen through, (103) 1870
  pain in, cause and treatment of, (111) 824
  tuberculosis of, (62) 145, (84) 972, (71) 1059
  tuberculosis of, primary, (17) 969
  tuberculosis of, solitary, (32) 590
  tumors, (113) 1243—ab
  tumors, diagnosis of, (140) 1864
  tumors, doubtful, clinical and pathologic aspects of, (3) 1336
Breast tumors, improvement in operations for, (100) 1135—ab
  tumors of, obtaining better results in malignant cases, (90) 1514—ab
  unilateral development of, in male, (12) 657
Breathing exercises in asthma, (113) 245
  in tabes, disturbances in, (143) 423
Breus mole, three cases of, (131) 1691
British Medical Journal, educational number of, (11) 1137
Bromid and deprivation of salt, prolonged treatment of epilepsy with, (41) 2012—ab
  eruption mistaken for blastomycosis, (54) 1779
Bronchi and esophagus, foreign bodies in, and false foreign bodies, (45) 1064—ab
Bronchial asthma, sodium nitrite in, *2098
  asthma, treatment of, by vaccine, (15) 1599—ab
  breathing, auscultation of, over thorax as sign of mediastinal tumor or aneurism, (129) 753—ab
  glands, advanced tuberculosis of, without clinical manifestations, (61) 1868
  lesions, chronic non-tuberculous, (112) 421
  lesions of tuberculous lung, (66) 979
  lymph glands, tuberculous adenitis of, probably causing intermittent atelectasis, (45) 323
Bronchiectasis, treatment of, (76) 749—ab
Bronchitis, treatment of, (39) 1696
Bronchoesophagoscopy, instrumentation for, modifications of, result of experience, (43) 490
Bronchopneumonia, (80) 1780
  acute, in children, (41) 143
  of elderly, leucocyte balance in, (36) 658
  treatment of, (19) 327
Bronchoscopy and esophagoscopy, (76, 77) 324, *1009
  and esophagoscopy—technic, utility and dangers, (34) 77
  importance of, for internal medicine, (64) 2137—ab
  tracheoscopy and esophagoscopy, (151) 247
Bronchus, foreign body in, tracheobronchoscopy for, (5) 1430
  right, foreign body in, (53) 1943
Brother's keeper, am I, (29) 143
Brown-Séquard syndrome, present status of, (81) 592
Brown-tail moth dermatitis, *1463
Bryonin, (60) 1944
Bubo, suppurating, simple method for treatment of, (21) 969—ab
Buffalo Academy of Medicine, in 1908-09, (85) 1235
Bullet in brain, removal and recovery, (100) 2038
  removal of, from inner wall of middle ear, (113) 1060
Bullous impetigo contagiosa of newborn, *358
Bundle-of-His, and superior venacava, special muscular connection between, (79) 1951
Bunion and hallux valgus, (69) 742
Bunions and corns, (41) 1696
Burn, followed by galactorrhea, (128) 246
  involving one-half body area; recovery, (22) 2131—ab
Burns and scalds, (117) 744
  hydriatic treatment of, and of other defects in skin, (108) 155-ab
  of eye and its appendages, (127) 237
  postmortem, research on, (163) 1343
Bursopathy, luetic, of Verneuil, (32) 1231
Buttermilk in infant feeding, (49) 328, (108) 421—ab
Butyrometric test meal, Sahli, modification of, (86) 655—ab

  of breast, medullary, and streptococcus infection in pregnancy, (132) 147
  of breast, metastases in, (84) 1059—ab
  of breast, pavement epithelium, (142) 88
  of cecum, diagnosis and treatment of, (18) 1231—ab
  of Cervix: See Cancer of Cervix.
  of chorioid, metastatic, (107) 973-ab
  of jejunum, (79) 1869
  of jejunum and ileum, primary, (2) 484
  of large intestine and rectum, inoperable, value of colostomy in, (61) 491—ab
  of large intestine, radical operation of, (59) 491—ab
  of larynx, excision for, (127) 744-ab
  of larynx, operative treatment of, (96) 662—ab
  of larynx, clinical diagnosis and operative procedure in, (115) 1060
  of larynx, intrinsic, laryngeal fissure for, (47) 323
  of lower lip, radical operation for, (125) 656—ab
  of lung, secondary, (8) 485—ab
  of lungs, primary, (56) 144—ab
  of male breast, (130) 1605—ab
  of neck, primary, (123) 1694
  of orbit, metastatic, (151) 1516
  of prostate, osteoplastic, (114) 415—ab
  of rectum, method of performing *abdomino-perineal excision* for, and of terminal portion of pelvic colon, (63) 1692—ab
  of rectum, operability of, dependent on its clinical course rather than on its shape and structure, (116) 1142
  of sigmoid with metastasis in left ilium, *1740
  of thyroid, epidemic, in fishes, (119) 2038
  of uterus, (152) 1599
  of uterus, early recognition of, (51) 1696
  of uterus, how can we best educate women to seek relief early from? (70) 1944—ab
  of uterus, operative treatment of, (29) 1696
  on diverticulitis of sigmoid, (29) 1777
  sarcoma as recurrence of, in thyroid, (119) 1871
  x-ray, (15) 1436
Carcinomas, multiple, (83) 901—ab
  uterine and high rectal, laparotomy under Momberg's belt constriction for, (84) 84—ab
Cardiac: See Heart.
Cardiolysis, operation of, (5) 238
Cardiospasm, (132) 157—ab, (44) 1332
  treatment of, (116) 824—ab
Cardiovascular and nervous syndrones, associated, (41) 1778
  changes in lithemia, (50) 1058
  changes, in nephritis, nature of, (39) 1861
  conditions, clinical methods of investigating, (27) 1431
  disease, ocular signs of, (120) 325
  disease, spontaneous occurrence of, in dog, (126) 1434
  manifestations of gout, (29) 490
  system, experiments with Graupner's test for estimating functional power of, (116) 1598—ab
  system, fundamental functions of muscle-cells of, with suggestion of classification of arterial disorders, (1) 2129—ab
Carlsbad cure, influence of, on gallstones, (111) 1870
Carotids, external, ligation of, (102) 236—ab
Carrot soup in cholera infantum, (76) 153—ab
Cartilage, floating, in elbow joint, (47) 1332
  triangular, of nose, submucous resection of, (5) 75—ab
Casein and edestin, leucin fraction in, (43) 1232
  in cow's milk, determination of, (17) 1132—ab
  in cow's milk, volumetric method for estimation of, (45) 1232—ab
  masses, so-called, in infants stools, (127) 1694—ab
Castration in mammary carcinoma, (125) 1341—ab
  influence of, in osteomalacia, (50) 2012
Casts and albumin, clinical significance of, in urine, (38) 1861—ab
  to cut open, (133) 422
Catalepsy in boy of 15, (10) 238—ab
Cataphoresis or treatment by ionization, (17) 746
Cataract cases, preparation, assistance, after-treatment, and management, (41) 151
  complete hard, with extraction, at age of fourteen, (72) 1780
  congenital, with unusual atrophy of iris from secondary glaucoma, (137) 818
  extraction, corneo-conjunctival bridge in, (32) 1600—ab
  extraction, collapse of sclerotic during, (114) 973
  extraction, capsule forceps in, (108) 79, (137) 1599
  extraction, historical review of development of, (18) 77, (142) 1781
  extraction in capsule, (67) 742, *782, (97) 817, (18) 820, (69) 1696—ab, (136) 1599—ab, (31) 1861, (64) 2132
  extraction, in capsule by division of suspensory ligament, (38) 820
  extraction, in capsule, new method for, *1186
  extraction in capsule, technic and prognosis of operations, (152) 496
  extraction, methods of, (9) 593
  extractions modified, Smith operation for, (31) 1861, (40) 2036
  extraction of, unusual complications of, (138) 1599
  incipient senile, organotherapy of, (75) 1066
  incipient senile, serotherapy of, (58) 660—ab
  operative treatment of, (2) 1695, (92) 1869
  senile, etiology of, (65) 1862—ab
  Smith operation for, (19) 77, (45) 485, *777
  surgery, minor points in, *285
Catarrh, gastrointestinal, symptoms of, small epidemic of jaundice with, (28) 1431—ab
  laryngeal, (70) 1951—ab
  nasal, constitutional conditions affecting, (84) 1945
  of intestines, chronic, diagnosis and treatment, (120) 147
Catgut, buried, and subcuticular stitch, in plastic operations on perineum, (110) 1434—ab
  chromic, modified plan for preparation of, (8) 489
  formalin-iodin, (4) 1516—ab
  iodized, especially for operations on stomach and intestine, (162) 424
  preparation of, bacteriologic desideration in, (136) 495
  sterile, (102) 1870—ab
  tetanus from, (79) 1240—ab
Cathartics, investigation of irritating effects of, (47) 2131—ab
  present knowledge of action of, (160) 1062—ab
Catheter, retention, suture through laparotomy of severed ureter over, (113) 1871—ab
  ureteral, data acquired with aid of, (84) 1597
Catheterization and operation, relative advantages of, prostatic enlargement, (4) 593—ab
  ureteral, and cystoscopy, (70) 78
Cattle fairs and tuberculosis, connection between, in Ireland, (9) 1062
  intestinal tuberculosis in, (37) 1867, (16) 2179
  piroplasma and trypanosoma of, development of, in artificial culture media, (52) 1134
  prevention of tuberculosis in, (37) 1237
Cecostomy, new, permitting free irrigation of small and large intestine, in surgical treatment of diarrhea, (59) 1432
  operation of choice for temporary drainage of colon, *1562
Cecum, carcinoma of, diagnosis and treatment, (18) 1231—ab
  dilatation of, as independent morbid entity and its relation to appendicitis, (79) 1786—ab
  incarceration of, with chronic appendicitis, (106) 494
  movable, (65) 660, (61) 1065—ab
  primary inflammation of, (62) 1605
  sarcoma of, (93) 1333
Celiac parotitis, (43) 1595
Celiotomy: See Laparotomy
Cell growth, pathologic reaction to, (94) 2045
Celloidin and parchment membranes, bacterial integrity of, (59) 412-ab
Cells, giant, Langhan's, in striped muscles in syphilis and their importance for diagnosis, (80) 492
  muscle, of cardiovascular system, fundamental functions of, with suggestion of classification of arterial disorders, (1) 2129—ab
  nerve, morphologic changes in, resulting from overwork in relation with experimental anemia and shock, (68) 592
  nucleated, changes with age in number of, in thymus, (100) 2046
  plasma, importance of differential diagnosis of, in suppurative inflammation in uterine adnexia, (69) 330
  tissue, connective, transmission of epithelium of tonsil into, (75) 324
  vesicular, origin of, in spleen nodules, (160) 1343
Celsus on diseases of stomach, (17) 1777
Centenarianism, problem of, (105) 1335
Cerebellar Cerebellum: See also Brain
Cerebellum and posterior portions of medulla, pons and cerebral peduncle and posterior limb of one internal capsule, extensive gliomatous tumor involving, *2086
  differential diagnosis of tumors of, (16) 892
  and inner ear, in experimental nystagmus, diagnosis of lesions of, (42) 78—ab
  tumor of, (77) 145
  tumor of, successful removal of, *364
Cerebral: See also Brain
Cerebral peduncle and pons and posterior limb of one internal capsule, cerebellum and posterior portions of medulla, extensive gliomatous tumor involving, *2086
Cerebrospinal Fever: See Meningitis
Cerebrospinal fluid in experimental trypanosomiasis, (82) 2138
  fluid, with extraordinary lymphocytosis in general paralysis of insane, (7) 81—ab
Certificates, medical, (126) 824
  medicolegal, (55) 660—ab
Cervicismus as cause of dysmenorrhea, (111) 1434
Cervix-uteri, adenocarcinoma of, colloid, (71) 1519
  cancer of, bearings of pathology on prevention, diagnosis and surgical cure of, (27) 328
  cancer of, frequency of, (16) 590
  cancer of, permanent operative cures of (175) 1343—ab
  cancer of, end-results of enlarged vaginal hysterectomy for, (106) 1700
  dilatation of, (108) 332
  dilatation of, artificial, obstetric indications for, and methods of, (21) 590
  dilatation of, instrumental, for rapid delivery, (48) 1061, (48) 1784—ab

Cervix-uteri, dilatation of, manual for rapid delivery, (50) 1064—ab
  dilatation of, instrumental, in eclampsia, with cicatricial stenosis of, (129) 87
  elongated, surgical treatment of, (127) 825—ab
  hysterectomy by, anterior section of, (51) 1139
  indications for delivery by rapid dilatation of, (48) 1784—ab
  lacerations of, (87) 1135
  lacerations of, and rupture of fetal membranes, relation between time of, (2) 2133—ab
  stenosis of, cured by supravaginal resection, (115) 1343
  tuberculosis, papillary, of, (89) 901
Cesarean-section, (85) 420, (111) 1235, (102) 1953
  and instrumental delivery through vagina, (100) 1598—ab
  at term for tumor of retrovaginal septum, (79) 815
  because of obstruction by fibroid tumor, (22) 81
  cervical, (24) 1512—ab
  complicated by uterine myoma, (17) 239
  extraperitoneal, (127) 984, (155) 1343, (99) 1953
  extraperitoneal, and delivery through utero-abdominal wall fistula, (88) 420
  extraperitoneal, history of, (62) 596
  extraperitoneal, technic for, (141) 157, (68) 2043
  in eclampsia, (85) 1514
  in placenta prævia, (123) 147—ab (13) 1430—ab, (101) 1870
  indications for, (66) 1513
  in placenta prævia, abdominal, indications for, (124) 147—ab
  in pregnancy complicated by uterine myoma, (17) 239
  indications for, (116) 896
  justifiability of sterilizing a woman after, with view to preventing subsequent pregnancies, (126) 147—ab
  obstetrician a specialist, (111) 2038
  Porro, necessitated by large multilocular ovarian cyst, (158) 81
  repeated, (58) 748—ab
  sterilization in, (125) 147—ab
  suprasymphyseal, (51) 1438—ab
  suprasymphyseal cervical, (44) 1064—ab
  that must be elective, (70) 145
  vaginal, (120) 1442, (25) 1511
  vaginal, in placenta prævia, *1395
  vaginal, in pre-eclamptic stage, diagnosis and treatment of eclamptic toxemia, (133) 1694
  vaginal, with *contracted pelvis, and* operative era in obstetrics, (87) 420
  vs. craniotomy in slightly contracted pelvis, (140) 974
  vs. hebosteotomy, in narrow pelvis, (23) 815, (143) 974
Cesarean sections, six successful, (77) 815
  100 in Boston Lying-in Hospital, (10) 2129
Chancre, primary, syphilis without, (11) 1237
Change of base, (38) 234
Character, importance of athletic games in formation of, and advantages of anatomy as disciplinary study, (25) 1600
Charcoal, cocoanut, emanation of radium absorbed and retained by, *624
Charcot's disease, (131) 1236
Chart for axis of astigmatic glasses, (140) 818
  temperature, interpretation of, (22) 490
Cheek, orbit and upper jaw, removal of half of face, for sarcoma of, rectal anesthesia, (95) 1433—ab
Cheeks, plastic operations on, (122) 1700
Cheese, intoxication from, (66) 1519—ab
Chemical correlations in organism, (97) 85
Chemistry, colloidal, and balneology, (123) 824
  expert, *in development of life and* its bearing on medical science, (132) 1061
  of intestines during ingestion of alien colon bacilli, (93) 1953
  study of, in medical schools, (137) 657
Chest: See also Thorax
Chest, artificial respiration and aspiration of air from, simple apparatus for, (97) 663
Chest, framework of, and heart, importance of proportions between, for functioning of latter, (144) 157
  mobilization of wall of, and release of lung, in unilateral pulmonary tuberculosis, (120) 1701-ab
  muscles, rigidity of, as sign of involvement of pulmonary parenchyma, (3) 1591
  protrusion *and depression of*, with pneumothorax, (129) 1605—ab
  walls, mobilization of, (102) 751-ab
  wounds of, (77) 212
Chicken sandwiches, food-poisoning by, *866
  tasteless cold-storage, used *as* food, effect of, (145) 897
Chickens, young, fatal spteicemia in, (69) 592
Child: See also Children
Child and public school, (106) 1135
  dangers *to, in operative* deliveries, (8) 232

  sporadic, (2) 1236
  thyroid extract in, (160) 1516
Cretins, physical development of, under thyroid treatment, (116) 245—ab
Crime, insanity defense for, (124) 896—ab
  responsibility and punishment for, in insanity, (113) 818—ab
Criminal simulation, (11) 1511
Criminals and other defectives, sterilization of, by vasectomy, (122) 415—ab, *1897, (21) 2035
Cripples in Germany, (86) 901
Crotalus adamanateus, experimental glomerular lesion caused by, (40) 591
  venom, agglutination of human and rabbit blood corpuscles by, (65) 592
  venom, hemolysis of human and rabbit erythrocytes by, *845
Croup, membranous, (85) 414
  membranous, treatment of, (96) 146
Crying, incessant, a symptom of inherited syphilis, (50) 328
Crystals, hemochromogen, determination of, (80) 1240
Cul-de-sac of Douglas, obliteration of, in treatment of uterine prolapse, (59) 821—ab
Culture, clot, with agglutination test in typhoid, (85) 655
  media, artificial, development of piroplasma and trypanosoma of cattle in, (52) 1134
Cure and prevention, (8) 1330
Curette, adventures with, (24) 1138
  use and abuse of, (58) 894
  use of, (39) 2035
Current, Morton wave, in diseases of prostate, (108) 414
Currents, High-Frequency: See High-Frequency
Curvature, lateral, mechanics of, (143) 80
Cyanid, strychnin and other *forms* of non-corrosive poisoning, adrenalin as emergency treatment in, (52) 1238
Cyanids and iron, action of, on spon*taneous oxidation of cystin,* (48) 893—ab
Cyanosis and polycythemia, congenital heart defect with, (153) 905
  congenital, (52) 978
  extreme, with gastric dilatation, (31) 977—ab
  obstruction producing, causes of, during nasal administration of *nitrous oxid,* (7) 657
  rare forms of, (7) 484—ab
  stasis, following epileptic seizure, simulating traumatic asphyxia, *(101)* 236
Cyclodialysis, operative treatment of glaucoma by, *765
*Cycloplegia, transient, due to glyco*suria, (66) 815, (91) 817
Cycloplegic action of alypin, (39) 820
Cyst: See also Cysts
  adenoma, spontaneous rupture of, ovarian tumors due to, (15) 239-ab
  appendiceal, (102) 1433
  chylous, of iliac mesentery, (65) 1944—ab
  dermoid, of testicle, (120) 2038
  dermoid, successfully removed by ovariotomy, (82) 1514
  endochorial amniotic, (72) 1519
  gastric mucosa, in esophagus, (42) 1949
  hydatid, advantages of treating, by injection of silver fluorid, (114) 1068—ab
  hydatid, in liver, transthoracic wave as sign of, (45) 747—ab
  hydatid, of left ventricle, (28) 2040
  hydatid, *of uterus: hysterectomy;* death after 48 hours, (22) 150
  hydatid, unusual case of, diagnosis and treatment, (12) 1516—ab
  of brain in child of 6, (159) 81
  of epiglottis, (108) 1235
  of liver, congenital, (45) 2131
  of round ligament of liver, (16) 1231
  of wall of carotid artery, (69) 1433—ab
  ovarian, differentiation of, from pregnancy, (148) 905
  ovarian, *lateral retroperitoneal,* (70) 84
  ovarian, multilocular, large, complicating pregnancy, Porro Cesarean section, recovery of mother and child, (158) 81
  ovarian, unusually large, removal *of, (66) 1234*—ab
  ovarian, with twisted pedicle, complicating pregnancy, (120) 1945
  pancreatic, in infant, (26) 151
  paroöphoric, epithelial contents of, (35) 746
  parovarian, right, rupture of, simulating *syndrome of* acute appendicitis, (133) 1341
  small blood, retrouterine hematocele from rupture of, in ovary, (62) 329—ab
  spontaneous serous, floating free in anterior chamber, (143) 1599
Cystadenoma, liver, and ovarian tumors, differential diagnosis of, (172) 1343
Cystein, spontaneous oxidation of, action of metals and strong salt solutions on, (49) 893
  spontaneous oxidation of, action of *iron and cyanids on,* (48) 893—ab
Cysticercus-cellulosæ, hooklets of, in man, (52) 240
  subconjunctival, (67) 2132
Cystinuria, protein metabolism in, (52) 893
Cystitis and gonorrhea, treatment of, (123) 1336
  and ulceration of bladder in women, (103) 236
  diagnosis and treatment of, in male, (141) 1695
  foreign-body, (140) 326
  painful, (50) 1950—ab
  ulcerative, caused by pseudodiphtheria bacillus, immuniologic observations on, (50) 412—ab
Cystocele, *1707
  new operative technic to establish *sound pelvic floor* and to prevent, *1355
Cystoma, ovarian, *torsion of pedicle* of, in young girl, *1102
  ovarian, wall of, giant-celled sarcoma in, (110) 332
Cystomas, dermoid, large bilateral, *removed without* interfering with pregnancy, (140) 754
Cystoscope, intravesical *operations* with aid of, (109) 1335
  removal of hair-pin in bladder by, (55) 234
  snare, (98) 1869
  teaching, *combined* direct and indirect, (16) 1690
  use of, (36) 240
Cystoscopes, water, suggestions in use of, (86) 742

  honor to whom honor is due, (66) 1059
  in Arkansas, *717
  in Colorado, (104) 2038
  in Illinois, *1087
  in Maryland, (113) 414—ab
  in Mississippi, (96) 1235
  in Virginia, *1085
  in United States, *274, (77) 1059—ab
  in United States, agricultural aspects of, (10) 322—ab
  leprosy and tertiary syphilis, similarity in symptoms of, (60) 2132
  prognosis and treatment of, (87) 1511
  report of nine cases of, (2) 813—ab
  skin lesions of, differential points in, (13) 1942—ab
  symptomatology of, (59) 2132
Pelvic abscess, bilateral, during pregnancy, (38) 746
  and abdominal operations, removal of gallstones coincident to, (87) 236
  disease and appendicitis, differential diagnosis between, (60) 486
  diseases, chronic, constitutional treatment of, (148) 1436
  diseases in women, ionic medication in, (2) 489
  disease, prevention of, in women, (38) 328
  disorders in girls and young women, etiology, prophylaxis and treatment of, (144) 80
  disorders, symptoms of, influence of corsets and high-heeled shoes on, (53) 323
  disproportion, labor obstructed by, management of, (123) 656
  floor, involuntary muscle fibers of, (82) 487
  floor, muscular supports of, influence of delivery on, (136) 753
  floor, repair of injuries of, (75) 2037
  girdle, joints of, importance of, (84) 79
  infection, following labor, (30) 1058
  infection, operative treatment of, (74) 815
  infections, latent, (58) 486
  inflammation of tubal origin, choice of time for operation for, (122) 656
  operations in female, per vaginam, (153) 975
  organs, surgery of, conservatism in, (130) 147—ab, (89) 487, (129) 1135
  outlet, contractions of, frequency, etiology, and practical significance of, (62) 324—ab
  outlet, operation for restoration of, based on anatomic structure and physiologic functions of parts, (20) 1942—ab
  viscera, statistics of, and their relationship to operative treatment of uterovaginal prolapse, (34) 1783
Pelvis and abdomen, disease of, and mental alienation in women, *1069
  bloodless surgery of, Momburg's tubing as tourniquet for, (80) 980—ab, (127) 1515
  chronic inflammatory mass in, preferable time for abdominal operation for, (80) 1597—ab
  conditions in, with congenital hip dislocation, (44) 2042
  contracted, moderately, management of labor with, (110) 2139
  contracted, treatment of, (76) 901—ab, (8) 1599
  contracted, treatment of, and indications for pelvic-enlarging operations, (66) 1869—ab
  diagnosis of diseases of, in women, (41) 411
  diagnosis of tumors of, (33) 1517
  direct pushing up of, as modification of Trendelenburg position, (137) 333—ab
  dislocation of, in coasting accidents, (95) 1441—ab
  fetal, reconstruction models of, (25) 1237
  fixation of upper end of femur to, in resection of hip joint, (128) 904
  fracture of, and rupture of bladder, (41) 1861
  fracture of, and urethral injury, (103) 325—ab
  fracture of, detachment of rectum in, (62) 1951
Pelvis, gage for internal measurement of, (145) 1524
  instrument for measuring oblique conjugate diameter, (137) 753
  lowering of, for operations, (109) 1340
  measurement of true *conjugate*, diameter of, (135), 333, (104) 1068
  narrow, hebosteotomy vs. Cesarean section, (23) 815, (143) 974
  of non-pregnant woman, operative enlargement of, (64) 1914—ab
  slightly contracted, craniotomy vs. Cesarean section in, (140) 974
Pemphigus, death in collapse, (97) 236
  irritation and phototherapy in, (115) 86
  neonatorum, or bullous impetigo contagiosa of new-born, *358
  of conjunctiva, (49) 323
  of throat, (106) 1235—ab
  septic, acute, (53) 1779
Penicillium camemberti, intracellular enzymes of, (47) 1232
Penis, gangrenous inflammation of, (48) 1438—ab
  importance of papillæ of, (71) 1951
  scrotum, testicle and cord, neoplasms of, (16) 1511
People and medical profession, (152) 745
  physician, health-officer and communicable disease, (56) 1332
Pepsin, amount of, in disorders of stomach, (15) 77—ab
  secretion of, (145) 334
  simple method for quantitative determination of, in gastric juice, (110) 817
Peptones and albumoses which fail to give characteristic reactions, (109) 663
Percentages vs. calories in infant feeding, *1265
Percussion, Augenbrugger inventor of, (126) 156
  ausculatory, and allied methods, determination of hepatic area by, and by x-ray, (22) 1330
  findings with pleural effusions, (109) 494
  notes, pulmonary, theoretical considerations of, (37) 1600
Perforation, multiple traumatic, of small intestine, (106) 79—ab
Periappendicitis: See Appendicitis
Periarteritis, nodose, (88) 662
Pericardium, adherent, and mediastinopericarditis, surgical treatment of, (63) 1601—ab
  symptoms of effusion in, and puncture, (118) 1243—ab
  tuberculosis of, cured by incision and drainage, (2) 652
Pericolitis, membranous, (79) 1333
Pericystitis, suppurative, (5) 1230-ab
Perineum during labor and conduction of delivery in relation thereto, (11) 593
  laceration of, cause and cure of, (86) 1440
  plastic operations on, buried catgut and subcuticular stitch in, (110) 1434—ab
  prevention of lacerations of, (74) 815
  restoration of, after recent laceration, (49) 1233
  Tait's operation for complete laceration of, (87) 1333
  tears of, immediate repair of, technic for local anesthesia for, (126) 332
Periostitis, acute orbital, due to dental disease, (24) 1436
Perisigmoiditis, acute, with effusion, (109) 751—ab
Peristalsis of stomach, visible, (66) 1239, (101) 1242—ab
  reverse, (138) 1136—ab
Perithelioma of brain, (83) 972—ab
  testis, (46) 411
Peritoneal bands, intestinal obstruction from, (103) 1694
  cavity, and hernial sac, organic free bodies in, (120) 1871—ab
  cavity, spontaneous rupture of pyosalpinx into, producing acute diffuse peritonitis, (119) 1946—ab
  sac, emptying, (84) 2044—ab
Peritoneum adhesions of, (9) 892
  changes in, in hernial sac, (72) 492
  elasticity of, and development of acquired hernia, (71) 492
  metastatic carcinoma in, genesis of, (125) 156
  significance of adhesions of, following operations, (55) 323
  surgery of, practical aspects of, (1) 1131
  tuberculosis of, *943, (118) 1946—ab
Peritonitis, acute, (27) 2134
  acute, during puerperium cured by *operation*, (104) 663—ab
Peritonitis, acute general, in girl, (68) 742
  and acute rupture of appendix, operation, recovery, (37) 151
  and pus, appendicitis with, (62) 1059—ab
  as complication of fibroids, especially with torsion of pedicle, (40) 1138
  causes of, (136) 325
  diffuse, acute, from spontaneous rupture of pyosalpinx into peritoneal cavity, (119) 1946—ab
  diffuse, after appendicitis, (91) 750—ab
  diffuse, septic, from appendicitis, treatment of, in first 24 hours, (123) 1946—ab
  fetal, (101) 86
  Fowler position in, and description of Gorham bed, (18) 1777
  from perforation of cancer of rectum, (54) 899
  general, complicating appendicitis (25) 741
  general, vs. diffuse suppurative appendicitis, (52) 970
  gynecologic, (105) 1142—ab
  intravenous adrenalin-saline infusion in, (76) 980—ab
  pneumococcal, (19) 1336
  progressive, blood in, (116) 1701—ab
  puerperal, and thrombophlebitis, operative treatment of, (77) 1520—ab
  suppurative, after appendicitis, treatment of, (29) 485
  suppurative, diffuse, (68) 1059, (138) 1515
  suppurative, diffuse, operative treatment of, (77) 1698—ab
  suppurative, diffuse, treatment of, (93) 656, (62) 894—ab
  suppurative, free perforative, (88) 973—ab
  suppurative, general, due to gangrenous appendicitis and followed by suphrenic abscess (24) 151
  surgical treatment of, (69) 822, (80) 1066—ab
  treatment of, utilization of natural defensive forceps in, (56) 595—ab
  treatment of, with regard to primary enterostomy, (135) 1700
  tuberculous, in infants, (53) 328
  tuberculous, laparotomy for, and suprapubic prostatectomy 3½ years later, (122) 1694
  tuberculous, plastic, (50) 970—ab
  tuberculous, treatment of, (86) 1780
  tuberculous, x-ray treatment of, (54) 328—ab
  uterine myomata and pregnancy, (19) 892
Peritonotomy, directions for preoperative and postoperative treatment of, for nurses and interns, (40) 741
Persistence, features that make for, (31) 1237
Personality, dissociated, (59) 1134—ab
Perry and cider, (36) 82
Perspiration, toxicity of, (57) 1058
Pertussis: See Whooping Cough
Pessary, stem, final word on, for amenorrhea, dysmenorrhea, sterility, etc., *1730
Phagocytes, method of obtaining human plasma free from chemical action, its effect on, (77) 1862
Phalangitis, heredo-syphilitica, Hochsinger, in an infant, (96) 236
Pharmaceutical preparations, misleading names of, (85) 1066
Pharmacist, ability of, to meet physician's demands, (102) 895
  and physician, relations of, (103) 895, (79) 972
  physician's demands of, (100) 895
  relation of, to practice of medicine, (28) 1058
Pharmacists, word from, (137) 1781
Pharmacology, (7) 142
  and materia medica, (57) 1596
  facts and fancies in, (16) 1062
  teaching of, in smaller medical school, (85) 1059—ab
Pharmacopeia and dermatology, *264
  comparison of, with foreign pharmacopeias, (118) 147
  how can we make it more popular with physicians? (119) 147—ab
  report on proposed alterations in, by committee of Section on Ophthalmology, *793
  report on revision of, by committee of Section on Practice of Medicine, *791
  revision of, (117) 147, *1543
  what it is, and what it is not, (3) 321
Pharmacopeias, foreign comparison of U. S. Pharmacopeia with, (118) 147

Pharmacy and poisons act (British), 1908, and public health and safety, (28) 593
  practice of, practice of medicine to, (104) 146
  professional, standardization foundation of, (25) 653
Pharyngoscope, electric, (78) 324
  new method of examination of nasopharynx and larynx by, (16) 814—ab
Pharyngoscopic studies, (79) 324
Pharynx, acute pneumococcus infection of, (2) 326
  and adjoining regions, examination of, (83) 419
  and larynx, thorium and radium in diseases of, (22) 1138
  direct inspection of region of, (122) 903
  larynx and trachea, diphtheria of, (91) 973
  stenosis of, chronic, sleep sweats in, (42) 323
Phenol, action of, on rabies virus, (90) 1141
  antidotal effects of alcohol on, (168) 1062
  in traumatic tetanus, (121) 2140—ab
  injection of, for cure of synovial *ganglion, carbolic gangrene* of thumb following, (134) 325
  poisoning, *1821
Phenolphthalein, value of from therapeutic standpoint, *(129) 1336*
Phenomena, meningeal, and bacteriemia in croupous pneumonia in children, (79) 154—ab
  morbid, dynamics of, *(92) 1699*
  nervous, during pregnancy and labor, (167) 148
Phenyl derivatives of fatty acids, mode of oxidation of, in *animal* organism, (48) 486
Philippines, cholera outbreak in, suppression of, (45) 741, (112) 1945—ab
  clinical side of disease in, (25) 1331
  distribution of filaria in, (47) 741
  poisonous snakes of, (58) 1134
  work of board for study of tropical diseases in, (100) 1335
Phimosis, operation for, (97) 1787
Phipps Dispensary for Tuberculosis of Johns Hopkins Hospital, work in, (146) 975
Phlegmasia alba dolens and ovarian tumor, (77) 1944—ab
Phlebitis, fatal, of cerebral sinuses and veins in child, (80) 1234
  gonorrheal, (46) 899—ab
  otogenic sinus, and thrombosis, prognosis, prophylaxis and treatment of, (158) 906
  syphilitic, (44) 1139—ab
Phlegmon, woody, (111) 663
Phlegmons, median suprahyoid, (60) 2137—ab
  of hand, pathogenesis of, (50) 1139
Phlyctenular disease, staphylococcus vaccination in, (123) 325
Phobias and anguish states, (68) 748—ab
Phonasthenia, (45) 77
Phonetic values, primitive graphic signs in *pulmonary* work based on, *1541
Phosphate metabolism, influence of oxygen injections on, (106) 1953—ab
Phosphatides in light of modern research, (23) 1237
Phosphorus and lime metabolism in rachitis, (86) 84
  compounds, acid-soluble, of important feeding materials, nature of, (41) 1232
  indirect colorimetric determination of, with uranium acetate and potassium ferrocyanid, (53) 893
Photography, color, by Lumière process, (108), 325
Photoreceptors, integumentary nerves of fishes as, and their significance for origin of vertebrate eyes, (139) 1694
Phototherapy and irritation, experiments with pemphigus, etc., (115) 86
  in hands of general practitioner, (121) 421
  of laryngeal tuberculosis, (149) 247—ab
Phrenocardia a special heart neurosis, is it a morbid entity? (116) 903, (103) 244—ab
Phthaleins, and their derivatives, pharmacologic action of, and their behavior as purgatives, (97) 1060
Phthisiophobia, new type of, *995
Phthisis: See Tuberculosis
Phylogenesis, reversible, and tuberculosis, antagonistic *therapy of,* (71) 1065
Physic, progress of; and St. George's *Hospital, London, (29) 1517*
Physical sign, new, (7) 1594—ab
Physician: See also Practitioner
Physician, (61) 2037
  and deaf child, *2155
  and his duty to himself, (141) 1336
  and his avocation, (50) 592

epidemic, at Sheboygan, Wis., investigation of, (35) 815
epidemic resembling, (141) 905—ab
epidemic probably due to infection by carrier, (4) 1695
epidemic, small, from bacillus-carrier in dairy, (149) 88
epidemiologic studies of, *1257
etiology and prophylaxis of, in regiments, (60) 979—ab
etiology, diagnosis and prophylaxis of, in India, (29) 1063
etiology of, (68) 324
experimental, (65) 329
extract reaction, ocular, (105) 751-ab
from municipal standpoint, (47) 1133
how it spreads, (110) 244—ab
immunity and antityphoid inoculation, *1253
immunization against, (28) 411
in children and infants, (89) 414-ab, (33) 1133
in children, intestinal perforation during, (26) 1777—ab
in Manitoba with regard to Winnipeg, (31) 815—ab
in South, (38) 815—ab
in woman, isolation of B. typhosus from breast milk, (12) 589
incidence of disease as contracted in Massachusetts General Hospital from 1899 to 1908, (175) 1436
infection, transmission and dissemination of, how are we responsible for? (60) 592
intestinal hemorrhage in, (76) 1234—ab
insect carriers of, *1248
laboratory methods in diagnosis of, (79) 1059
modes and source of infection in, (24) 485
morbidity and mortality statistics of, in Middle West, (36) 815
outbreak of, at Clontarf, (34) 1867
outbreaks, epidemiologic diagnosis and treatment of, (37) 815—ab
pancreatic glycosuria ten years after, (3) 238
pathogenesis of, (67) 592—ab
pathology and treatment, (70) 324
perforation, symptoms and treatment of, (40) 2035
prevention of, (126) 325
prevention of, by vaccination and early diagnosis and isolation, (78) 145—ab
protective inoculation against, (176) 1436
relapse, subphrenic pyopneumothorax as complication of, (98) 493
running intermittent temperature, (67) 486
serodiagnosis of, (61) 486—ab
serotherapy of, (90) 1953
severe type of, management and treatment, (166) 1062
short duration, (50) 144—ab
specific treatment for, (25) 485—ab
spine, (16) 1865, (50) 2131
statistical analysis of over 68,000 cases of, (6) 1941—ab
surgical complication of, (83) 1059
surgical viewpoint of, (16) 2130
treatment of, (121) 147—ab, (91) 236, (82) 1059, (35) 1133, (88) 2133
ulcers in palate in, (117) 245—ab
vaccination against, with attenuated live cultures, (19) 976
vaccine therapy of, (14) 150—ab
Typhoid vaccines, preparation and keeping properties of, (21) 897—ab
value of milk-free diet and enteroclysis in, (95) 79

U

Ulcer, Duodenal: See Duodenal Ulcer
Gastric: See Gastric Ulcer
jejunal and gastrojejunal, following gastrojejunostomy, (59) 894—ab
large phagedenic, of abdomen, (20) 1231
Mooren's, *269
of leg, chronic treatment of, (8) 2039
peptic, in jejunum, (82) 242—ab
perforating, of foot cured by stretching nerve, (160) 158—ab
rodent, of cornea, *269
rodent, treated by potassium bichromate, (6) 1782—ab
serpiginous, gonorrheal, in men, (71) 1439
Ulceration, chronic, of rectum, (15) 1138—ab
of bladder and cystitis in women, (103) 236
of stomach, and necrosis of salivary glands resulting from experimental injection of bile salts, (45) 2036—ab
Ulcers in palate in typhoid, (117) 245—ab
leg, treatment of, by circular incision above ulcer, (134) 1244—ab
of leg, chronic varicose, (14) 1430
peptic, etiology and symptomatology of, (14) 1690—ab
perforating, of feet, in two brothers, caused by productive and obliterative endarteritis, (13) 1330
simple round, of duodenum, importance of distinguishing, from those ulcers which involve pylorus or are above it, (6) 969, (14) 1132
Ulna, sarcoma of, (36) 2035—ab
Ultramicroscope for early diagnosis of syphilis, (6) 1236
Umbilical-cord, blood in, special reaction in, (71) 661—ab
infection and hemorrhage, (102) 420
spontaneous tearing out of, (127) 1605
Umbilicus, adenoma of, (72) 84, (62) 491
cholesteatoma at, (112) 903
tumors of, probably of uterine origin, (49) 971—ab
Uncinaria infections, mild, (73) 413—ab
trichocephalus, and trichomonads, amebic enteritis with, results of treatment after four years, (17) 2130—ab
Uncinariasis, (26) 1058, (84) 1780, (58) 1779
in Panama, (29) 590
is poor physical development of southern recruits due to? (130) 415
or hookworm disease, (58) 1779
miner's anemia, Egyptian chlorosis, hookworm disease, (82) 1944
prevalence and importance of, among apparently healthy Southern-bred white men in U. S. *Army*, (82) 655—ab
Underclothing, colored, experiment to determine value of, for soldiers, (26) 240
Unfit, who are they? (1) 652—ab
Uniformity of action and habits, results of, (32) 1237
United-States camp of instruction for National Guard medical officers, Presidio of San Francisco, July 29 to Aug. 11, 1909, (140) 1336
reasons why school of tropical medicine should be established in, *1620
University of Pennsylvania, opening *of new medical amphitheatre and* clinical laboratory of hospital of, (133) 897
state, medical profession, and public, (54) 1058
Uranium acetate and potassium ferrocyanid, indirect colorimetric determination of phosphorus with, (53) 893
nitrate, experimental production of chronic nephritis in criminals by, (69) 412—ab
Urates, indirect solvent influence of radium on, (67) 153—ab
Urea and salt content of urine, simple office technic for determining, (75) 661
Uremia, acute, from turpentine, (21) 814
management of, *1796
sequel to scarlet fever, *2002
Ureter, anatomy and pathology, (36) 234
Ureter and kidney calculi, x-ray in diagnosis of, (69) 235
and kidney, neoplasms of, (18) 1511—ab
and kidney, surgery of, (24) 411
calculus in lower segment of, in female, (10) 76
calculus of, (16) 76, (115) 1598, (64) 1862
calculus in, diagnosis and treatment, (42) 1861—ab
catheter for, data acquired with aid of, (84) 1597
catheterization of, and cystoscopy, (70) 78
combined intraperitoneal and extraperitoneal ureterolithotomy for removal of stones from, (62) 1941—ab
endoscopy of mouth of, (118) 1442
free transplantation of, to serve for urethra, (80) 1698—ab
hernia of, (45) 2135—ab
implantation of, in high stump of rectum, after low enteroanastomosis with sigmoid flexure, (61) 1697
lower, female, diagnosis and treatment of stone in, (23) 2179—ab
or bladder, method of opening into, through vagina without risk of fistula, (55) 900—ab
strictures, diagnosis and treatment of, (125) 1700
suture of, over retention catheter, (113) 1871—ab
use of appendix to splice, *717
Ureterocystotomy in carcinoma of uterus, (65) 486
Ureters, extraperitoneal implantation of, into rectum in exstrophy of bladder, (49) 1058, (108) 1434—ab
implantation of, in intestines, (117) 86, (80) 236, (108) 1434—ab, (63) 1785—ab
injury of, during abdominal operations, (121) 1336
intravesical diverticula formed by, (152) 247
surgery of, (115) 1700—ab
Urethra, anterior, distended, direct visual inspection of, (99) 493
anterior, implantation of vasa deferentia in, (56) 1438, (107) 1441—ab
argyrol sealed into, to cure beginning gonorrhea, (90) 2038—ab
dilator for, Kollmann's, use of, (11) 657
female, dilatation of, (19) 490, (117) 1515
female, stricture of, (155) 826—ab
foreign body in, (20) 1777
free transplantation of ureter to serve for, (80) 1698—ab
hyperemia from hot sounds in treatment of, (82) 749—ab
hypospadias and other lesions of, technical difficulties in distention method for, (1) 740—ab
injury of, in fracture of pelvis, (103) 325—ab
male, fragmented filiform bougie removed from, without operation, (5) 1941
methods for relief of organic stricture of, in genitourinary surgical department of Jefferson Hospital, (128) 1336, (99) 1693
penile, impaction of phosphatic calculus in, acute retention of urine from, (91) 79
posterior, Goldschmidt's endoscopy of, (97) 1142
prostatic and membranous, of seven-year-old boy, congenital calculus in, (86) 2133
stricture of, (92) 414
stricture of bulbar portion of, resection, partial or complete, for, (11) 2177—ab
stricture of, in women, (139) 246
stricture of, organic, methods employed for relief of, in genito-urinary surgical department of Jefferson Hospital, (92) 2038
strictures of, and various post-strictural infections causing so-called chronic rheumatism or septic arthritis, (107) 414
Urethritis, specific, in male, treatment of, (4) 410
Uric-acid and its salts, physico-chemical behavior of, in blood and influence of radium, (73) 1440
infarcts in kidney of new-born, uricolysis and pathogenesis of, (51) 893—ab
origin of, (129) 1872—ab
pains, so-called, (131) 157—ab
production, increased, from coffee and methylxanthin in healthy and in gouty, (111) 752—ab
study of, (147) 751
treatment of, (26) 490—ab

Uricolysis, and pathogenesis of uric-acid infarcts in kidney of newborn, (51) 893—ab
Urinary and genital conditions, relief of, through surgery of seminal vesicles, (1) 1690—ab
  diagnosis, pitfalls in, (121) 1945
  fistulas in women; prophylaxis and treatment, (39) 1139—ab
  organs, B. colon infection of, vac*cine treatment of,* (142) 334—ab
Urinary-tract and urine, infection of, by B. coli, in infancy, (27) 1231
  ascending infection of, (70) 1785-ab
  tract, bacillary infection of, treated by corresponding serum and vaccine, (19) 150—ab
  deprivation of salt in affections of, during pregnancy, (58) 1784—ab
  instrumental injury of, (132) 1336
  new growths of, cystoscopy in, (19) 1511
  stones in, changes induced by, (74) 1785
  tuberculosis of, diagnosis and treatment of, (56) 152—ab
Urine, acute retention of, from impaction of phosphatic calculus in penile urethra, (91) 79
  albumin and casts in, clinical significance of, (38) 1861—ab
  albumin in, new method for quantitative estimation of, (105) 325-ab
  ammonia and acetone in, simple, rapid and accurate method of, *1738
  ammonia in, and new instrument for its rapid estimation, (7) 892—ab
  ammonia in, clinical estimation of, by formalin method, *2071
  and blood, influence of x-ray on composition of, in mixed-cell leucemia, (93) 1787—ab
  and blood, lactic acid in, in epilepsy and eclampsia, (61) 596-ab
  and urinary tract, infection of, by B. coli in infancy, (27) 1231
  appearance of albumin and tube-casts in, in chronic constipation, (63) 1868—ab
  Cammidge reaction in, (115) 488
  children's chemistry of, on diet rich or poor in albumin, (67) 418
  congenital dribbling of, operative treatment of, (107) 982—ab
  deficient excretion of solids in, (135) 1061
  detection of B-oxybutyric acid in, (57) 144
  diagnosis, pitfalls in, (72) 972
  diagnostic significance of epithelia in, (90) 742
  elimination of carbon in, (183) 1344
  examination, life insurance, a farce, (95) 1863—ab
  examination of, voided through in*testine, exstrophy of bladder cor*rected by Maydl's technic with, (117) 1700
  excretion in, of sugars, other than glucose, (44) 977
  fluctuations in composition of, in health and disease, (52) 1065—ab
  frequent failure of, to decompose in cases of pulmonary tuberculosis, (10) 977
  generally disregarded organic elements in, in diabetics, (58) 2136
  gouty, diminished excretion of pressor bases in, as compared with normal urine, (11) 820
  heart defect cells in, (103) 1142
  in gastroinestinal diseases of infancy, (89) 1060—ab
  indican in, diagnostic importance of, with obstruction of pancreatic duct, (116) 2139
  long bacillus in, in bacteriuria and cystitis, (94) 1440
  nitrogen in, clinical significance of, (53) 1595
  non-dializable constituents of, and toxic syndromes, (150) 158
  normal, pressor bases in, and their diminished excretion in gouty urine, (11) 820
  of children, origin of albumin in, (82) 1440
  of tuberculous patients, tubercle bacilli in, significance and dangers, (5) 740—ab
  postoperative suppression of, (19) 1330
  practical test for indican in, (7) 1430—ab
  protein of, resembling Bence-Jones albumose, clinical history and post-mortem findings, (5) 2129
  reaction for diagnosis of incipient tuberculosis, (64) 1519—ab
  reaction of, important factor in typhoid bacteriuria, (134) 246—ab
  salt and urea content of, simple office technic for determining, (75) 661
Urine sediment in athletes and nephritics, (141) 1144—ab
  specific gravity of, very high, in healthy women, (12) 1237—ab
  stained, xanthochroic bodies in, (135) 246—ab
  sugar in, criticism of tests for, (101) 420
  sugar in, improved quantitative test for, (62) 660—ab
  suppression of, simulating calculus anuria, (22) 976
  surgical significance of pus, blood and bacteria in, (10) 652
  tests for bile pigment in, (83) 1141—ab
  total sulphur in, estimation of, (55) 893
  transitory findings in, in diseases of childhood, *1622
  treatment of calcium oxalate deposit from, and oxaluria, (10) 1947—ab
  tubercle bacilli in, detection of, electrical reactions of bacteria applied to, by means of a current, (2) 416—ab
  two cases of gas constantly in, (125) 1871
Urogenital tuberculosis, (68) 655
Urticaria, straw mattress, (34) 1058—ab
Uterovaginal prolapse, operative treatment of, (34) 1783
Uterus, adenocarcinoma of, (52) 1697
  adenoma of, involvement of rectum in, (140) 333
  adenomyoma of, (39) 746
  and adnexa, plea for conservative treatment of, (154) 415
  and breast, malignant diseases of, early diagnosis of, with treatment, including Coley serum, (74) 79—ab
  and heart, action on, of pressor substances in putrid meat, placenta and ergot, (17) 1062
  and other cavities, improved technic for tamponing, (105) 663
  and vagina, accidental perforations of, (88) 1333
  and vagina, double, (65) 1951
  behavior of mucosa of, with myomas, (84) 901
  blood-tight, and its influence on involution, (4) 2133—ab
  calcification of fibromyomata of, (60) 742
  cancer of, abdominal hysterectomy for, (42) 899
  cancer of, abdominal total extirpation of, (136) 904
  cancer of, comparison of results of various methods of surgical treatment of, (126) 1605—ab
  cancer of, complicating pregnancy, (123) 87—ab, (13) 1599
  cancer of, crusade against, (34) 893, (109) 1434
  cancer of, fatalities after interventions on, (116) 332—ab
  cancer of, is there danger in exploratory disinfecting or palliative interventions in? (71) 979—ab
  cancer of, metastasis from, in skin, (117) 332
  cancer of, natural history of, (23) 490
  cancer of, new technic for extirpation of, (135) 905—ab
  cancer of, palliative treatment of, with thermocautery, *1887
  cancer of, radical operation for, (73) 972—ab
  cancer of, results of treatment of, (109) 332—ab
  cancer of, statistics of operations for, at Prague, (128) 825
  cancer of, treatment of, when too far advanced for hysterectomy, *1883
  carcinoma of, (152) 1599
  carcinoma of, early diagnosis of, (51) 1697
  carcinoma of, how can we best educate women to seek relief early from, (70) 1944—ab
  carcinoma of, inoperable, treatment, (82) 1333
  carcinoma of, surgery of, (29) 1696
  carcinoma of, Wertheim's operation for, ureterocystotomy, (65) 486
  carcinomas of, laparotomy under Momburg's belt constriction for, (84) 84—ab
  complete rupture of, (26) 417—ab
  congenital hyperanteflexion of, anatomy and etiology of, (89) 420
  contractions of, in labor, influence of spinal anesthesia on, (75) 1519—ab
  deviations of, significance, prevention and treatment, (124) 80
  disease of, chronic endometritis, endocervicitis, (13) 485
Uterus, disease of, or of uterine appendages, tumor of large intestine simulating, (17) 976—ab
  diseases of, (23) 653
  double, (9) 739, (117) 1522
  double, with birth of twins, (111) 332
  douches of superheated air for, (94) 154
  enucleation of myomas of, when and why performed? *1245
  fibroid, calcareous degeneration of, (71) 1944—ab
  fibroids of, (73) 486, (50) 1517
  fibroids of, abdominal myomectomy for, (57) 894, (67) 1233
  fibroids of, demanding operation, (139) 744—ab
  fibromyoma of, large, with torsion of internal genitalia, (48) 1517
  fibromyomas of, (38) 1138
  fibromyomas of, when shall we advise operation for? (102) 1515—ab
  gravid, retroflexed, unusual case of incarceration of, (49) 2042
  hemorrhage from, (70) 1233, (84) 1333
  hemorrhage from, in menopause and uterine cancer, (141) 237
  hemorrhage from, irregular, in young girl, (41) 1063
  hemorrhage from, myopathic, (84) 1333
  hemorrhage from, uncontrollable, (11) 1330—ab
  hemorrhage from, uncontrollable, optic neuritis resulting from, cured by vaginal hysterectomy, (124) 245
  hernia of, in men and women, (1) 1865—ab
  hydatid cyst of, hysterectomy, death after 48 hours, (22) 150
  Inflammation of: See Metritis
  inguinal hernia of rudimentary horn of, and of adnexa in infant with external genitals of intermediate type, (87) 1597
  injection of adrenalin to prevent hemorrhage while clearing out after abortion, (146) 423—ab
  inversion of, cured by posterior colpotomy and posterior section of uterus, (76) 815
  inverted, (24) 893
  isthmus of, and placenta formation at this point, (86) 420
  leiomyoma of, malignant, (117) 1946—ab
  malignant disease of, predisposing factors of, (22) 815
  myoma of, Cesarean hysterectomy in pregnancy complicated by, (17) 239
  myoma of, influence of, on labor, (72) 153—ab
  myoma of, pathogenesis of, (144) 88
  myomas of, fever with, (134) 333
  new technic for extirpation of, in operations for cancer, (135) 905-ab
  non-puerperal, uncontrollable hemorrhage from, (70) 1233
  normal, walls of, non-malignant invasion of, by chorioepithelium, (90) 493
  organs that support and move, (77) 901
  origin of tumors of, (138) 495—ab
  ovarian papillary adenocarcinoma with polypous metastasis in, (173) 1343
  pregnant, pathologic changes in contents of, gynecologic conditions which may arise from, and chorioepithelioma, (76) 1134
  prolapse of, (51) 1517
  prolapse of, influence of delivery on levator ani, and operations for, (125) 1244
  prolapse of, obliteration of Douglas pouch in treatment of, (59) 821-ab
  prolapse of, levator ani and recurrence after operations for, (119) 1522
  prolapse of, operations for, *16, (70) 901—ab, (63) 1733—ab
  prolapse of, technic of Schauta's operation for, (70) 330
  prolapse of, vaginal operation for, *16
  red degeneration of fibroids of, complicating pregnancy, (14) 239
  retrodisplacements of, surgical treatment of, (124) 974, *1072, (7) 2034
  retrodisplacements of, treatment of, (61) 1944—ab
  retroflexion of, complicated, operative treatment of, (127) 1244
  retroversion of, shortening round ligaments to correct, (120) 87—ab
  rupture of, (33) 322
  rupture of, during labor, (73) 1944—ab
Uterus, rupture of during labor, operation, (159) 819, (100) 1053
  rupture of, treated by abdominal hysterectomy, (25) 417—ab
  rupture of, complicating toxemia of pregnancy, (36) 746
  rupture of, treatment, (115) 332
  ruptured, with perfect recovery, (27) 658
  sarcoma of, in girl of 12 years, (101) 146
  sarcoma of, polypous, (52) 2042
  subserous and interstitial fibromas of, torsion of, (58) 821—ab
  thyroid and prostate, correlation of pathologic states between, especially epilepsy and other nervous disorders, (54) 2036
  treatment of, internal, (121) 896
  umbilical hernias probably originating from, (49) 971—ab
  vagina and rectum, prolapse of, (16) 969—ab
  vaginal operative treatment of, rupture of, without hysterectomy, (103) 1068—ab
  ventrofixation of, dystocia due to, (9) 1599
  wedge resection of fundus of, (118) 332
Uveal tract, flat sarcoma of, and angiosarcoma of orbit, (70) 1780

  portal, total obliteration of, (131) 1523
Vein, pulmonary, injury of, (53) 491
  renal, serum from, in treatment of nephritis, (56) 2127—ab
Veins and sinuses, cerebral, fatal phlebitis of, in child, (80) 1234
  implantation of, and circular suture of arteries, ultimate results of, (87) 242
  intramuscular inclusion of, treatment of varices by, (49) 1867
  ligation of, for suppurative portal thrombosis after appendicitis, (133) 753—ab
Veins, pulmonary, compression of, pressure factor in etiology of cardiac hydrothorax, (33) 1778—ab
  suprarenal, both, thrombosis of, acute Addison's disease after, in patient with gastric cancer, (93) 1340
  varicose, early total resection of, (64) 329—ab, (146) 1436
  varicose, of leg, (20) 1431
Vena-cava, superior, and bundle-of-His, special muscular connection between, (79) 1951
  superior, perforation of aneurism in aorta into, (185) 1314
Venereal-diseases, (125) 1598
  extent and importance of, in social body, (40) 231
  prevalence of, among recently arrived immigrants, (9) 1511
  sociologic aspect of, (37) 1861—ab
Venereal peril, is there, for us, (2) 2033
Venereal-prophylaxis, (90) 1433
  system of, and its results, (136) 974
Venesection and dermatology, (54) 1692—ab
  in uremia, *2002
Venom, cobra, mechanism of neutralization of, by its antitoxin, (64) 592
  Cobra, Reaction to: See Hemolysis
  crotalus, agglutination of human and rabbit blood corpuscles by, (65) 592
  crotalus, experimental glomerular lesion caused by, (40) 591
  crotalus, hemolysis of human and rabbit erythrocytes by, *845
Ventilation and humidity, departmental committee on, in humid cotton-weaving sheds, (16) 2040
  window, practical, *1290
Ventricle, fourth, puncture of, effects on kidney of, (152) 158
  lateral, variations in posterior horn of, (8) 2129—ab
  left, clinical symptoms of hypertrophy of, (123) 983—ab
  left, effects of cutting the branch of His bundle going to, (128) 1435-ab
  left, hydatid cyst of, (28) 2040
  right, development and structure of, and moderator band in relation to papillary muscles, (89) 146
  third, of brain, tumor in, (69) 1140
Ventrofixation of uterus, dystocia due to, (9) 1599
Veratrum viride in eclampsia, (131) 87—ab
Verneuil, luetic bursopathy of, (32) 1231
Veronal poisoning, acute, (19) 411
Verruga, pathology of blood in, (33) 1336
Version and extraction in transverse presentation, (144) 1343—ab
  and metreurysis, combined, (166 663
  indications for, with cephalic presentation, (179) 1344
Vertebra, lumbar, isolated fracture of transverse process of, (4) 1430
Vertebræ, cervical, conditions of malalignment of, their ocular signficance (89) 325
  injuries of, (114) 1340
Vertebrates, cold-blooded, rates of digestion in, influence of season and temperature, (118) 974
Verumontanum, inflammation of, (7) 739
Vesalius, (165) 1137
Vesicles, seminal, and prostate, pathology and surgical treatment of, (122) 1061
Vessels, muscles, nerves and organs, permanent color of, preservation of dissections of surgical anatomy with, (119) 656—ab
Vestibular irritation, phenomena of, in acute labyrinthine disease; studies of Barany of Vienna, (103) 1863
Vibriones in small intestine and in stool, (100) 1340
Victoria Nyanza, distribution of bilharziosis on, (11) 81
Vincent's spirillum and bacillus fusiformis in pseudomembranous anginas, *373
Violet rays and biniodid of mercury, germicidal effects of, (57) 1512
Viper or adder bite, (14) 1237
Virgins, normal and anomalous hymen in, (66) 1601
Virus, freshly prepared, danger-free method of using, from brain of hydrophobic rabbit, (3) 1430—ab
  invisible, (120) 494
  of epidemic poliomyelitis, nature of, *2095
  tuberculosis, granular form of, taking stain, (59) 1868
Viscera, abdominal and thoracic, diseases of, diagnostic value of pain in, (37) 143
  abdominal, civilization in relation to, and corset, (6) 2039—ab
  and blood of tuberculous, complications of pulmonary tuberculosis and distribution of tubercle bacilli in, (164) 1343
  forceps, new, *1560
  influence of poise on support and function of, and relation of posture in human efficiency, (10) 2177—ab
  pelvic, statics of, and operative treatment of uterovaginal prolapse, (34) 1783
  ptosis of, mechanical treatment of and new method of applying bandage, (109) 325—ab
  sensibility of, (140) 1342
  spoon, *1396
  syphilis of, (40) 1237
  thoracic, abdominal and pelvic, as dissected from back, anatomic and clinical study of, (19) 746
  thoracic, diseases of, (58) 1233
Visceral crises and angioneurotic edema in purpura rheumatica, (155) 1599
Visceroptosis: a historical review, (135) 325
Viscosimeter, (80) 1440
Viscosity and albumin content of blood on various diets, (117) 421
  hemoglobin and albumin content of child's blood, (74) 1951—ab
  of blood, (94) 750
Vision: See also Eyesight
Vision, acuity of, under definite conditions an index of strength of necessary spheric lens plus or minus which will give a vision of 6/6 or more, (139) 818
  binocular, and its disorders, diaphragm test for, (26) 1516
  color, testing, in railway employes, (144) 423

CURRENT MEDICAL LITERATURE

INDEX OF AUTHORS

In this Index are the names of the authors of articles which have appeared in THE JOURNAL of the American Medical Association and of articles which have been listed from week to week in the Department of Current Medical Literature as having appeared in other journals. Thus it practically includes the names of all who have published articles in the leading journals of the world during the past six months. To add to its completeness, the names have been added of those who read papers before societies as published in THE JOURNAL. The * preceding the page reference indicates that the article appeared in full in THE JOURNAL. The numbers in parentheses indicate the numbered paragraphs on the pages referred to. The numbers not-in parentheses indicate pages.
